Longhurst, C.A. Brebbia, J. Barnes, 2016-07-14 In these proceedings of the 24th International Conference on Modelling Monitoring and Management of Air Pollution international academics and air pollution practitioners contribute to the evolving understanding of the science and policy contexts of air pollution All the books from the conference series have discussed important air pollution issues at an international national and local level and by virtue of their truly international composition have brought to the discussion a unique suite of perspectives The conference findings enjoy a wide and rapid dissemination amongst the air pollution science and policy communities The management of air pollution is one of the most challenging problems facing the international community A particular strength of the series has been the attention given to regulatory and market solutions to air pollution management The Air Pollution series of conferences has consistently acknowledged that science remains the key to identifying the nature and scale of air pollution impacts and reaffirmed that science is essential in the formulation of policy relevant information for regulatory decision making The conference series also acknowledged at a very early stage that science alone will not improve a polluted atmosphere The scientific knowledge derived from well designed studies needs to be allied with further technical and economic studies in order to ensure cost effective and efficient mitigation In turn the science technology and economic outcomes are necessary but not sufficient Topics covered include Air pollution modelling Air pollution mitigation and management Aerosols and particles Emission studies Health effects Indoor air pollution Air data

quality Monitoring and measuring Case studies Air pollution control technologies Industrial air pollution Air pollution science Global and regional studies Climate change effects GIS Emerging pollutants Socio economic issues Public engagement Policy and legislation

*The South African Short Story in*

*English, 1920-2010* Marta Fossati, 2024-09-05 Through detailed close readings alongside investigations into the history of print culture Marta Fossati traces the development of the South African short story in English from the late 1920s to the first decade of the twenty first century She examines a selection of short stories by important Black South African writers Rolfe and Herbert Dhlomo Peter Abrahams Can Themba Alex La Guma Mtutuzeli Matshoba Ahmed Essop and Zo Wicomb with an alertness to the dialogue between ethics and aesthetics performed by these texts This new history of Black short fiction problematises and interrogates the often polarised readings of Black literature in South Africa that can be torn between notions of literariness protest and journalism Due to material constraints short fiction in South Africa circulated first and foremost through local print media which Fossati analyses in detail to show the cross fertilisation between journalism and the short story While rooted in the South African context the short stories considered also hold a translocal dimension allowing us to explore the ethical and aesthetic practice of intertextuality These are writings that complicate the aesthetics ethics binary generic classifications and the categories of the literary and the political Theoretically eclectic in its approach although largely underpinned by a narratological analysis *The South African Short Story in English 1920 2010 When Aesthetics Meets Ethics* offers a fresh perspective on the South African short story in English spotlighting several hitherto marginalised figures in South African literary studies
