Building a Validity Argument for the Test of English as a Foreign Language™
 Carol A. Chapelle, Mary K. Enright, Joan M. Jamieson, 2011-04-06

The Test of English as a Foreign Language™ TOEFL is used by more universities worldwide than any other test to assess English language proficiency for academic admission and placement decisions and to guide English language instruction. This landmark volume provides a detailed description and analysis of Educational Testing Service's research and development efforts to develop a major revision of the TOEFL test. The result is a book that serves as a case study of test design drawing upon theory in the complex domain of English language proficiency while attempting to meet standards of educational measurement. Building a Validity Argument for the Test of English as a Foreign Language™ is distinctive in its attempt to develop a coherent story of the rationale for a test or its revision, explain the research and development process, and provide the results of the validation process. Through its treatment of one test, it expands on and tests principles and approaches to educational measurement, providing an in-depth integrated perspective on the overall process of test revision. Moreover, because the conceptual foundation and history are presented alongside the empirical studies and validity argument, these sometimes disparate areas are presented in a way that demonstrates their connections, an approach which represents a departure from or extension of conventional materials on test revision. This volume is particularly relevant for professionals and graduate students in educational measurement, applied linguistics, and second language acquisition, as well as anyone interested in assessment issues.

The Routledge Handbook of Language Testing
 Glenn Fulcher, Luke Harding, 2021-12-15

This second edition of The Routledge Handbook of Language Testing provides an updated and comprehensive account of the area of language testing and assessment. The volume brings together 35 authoritative articles divided into ten sections, written by 51 leading specialists from around the world. There are five entirely new chapters covering the four skills: reading, writing, listening, and speaking, as well as a new entry on corpus linguistics and language testing. The remaining 30 chapters have been revised, often extensively or entirely rewritten, with new authorship teams at the helm, reflecting new generations of expertise in the field. With a dedicated section on technology in language testing reflecting current trends in the field, the Handbook also includes an extended epilogue written by Harding and Fulcher, contemplating what has changed between the first and second editions and charting a trajectory for the field of language testing and assessment. Providing a basis for discussion, project work, and the design of both language tests themselves and related validation research, this Handbook represents an invaluable resource for students

researchers and practitioners working in language testing and assessment and the wider field of language education
