The Divide Jason Hickel,2017-05-04 _____ There s no understanding global inequality without understanding its history In *The Divide* Jason Hickel brilliantly lays it out layer upon layer until you are left reeling with the outrage of it all Kate Raworth author of *Doughnut Economics* The richest eight people control more wealth than the poorest half of the world combined Today 60 per cent of the world s population lives on less than 5 a day Though global real GDP has nearly tripled since 1980 1 1 billion more people are now living in poverty For decades we have been told a story that development is working that poverty is a natural phenomenon and will be eradicated through aid by 2030 But just because it is a comforting tale doesn t make it true Poor countries are poor because they are integrated into the global economic system on unequal terms and aid only helps to hide this Drawing on pioneering research and years of first hand experience *The Divide* tracks the evolution of global inequality from the expeditions of Christopher Columbus to the present day offering

revelatory answers to some of humanity's greatest problems. It is a provocative, urgent and ultimately uplifting account of how the world works and how it can change for the better.

Extractive Industries and Changing State Dynamics in Africa Jon Schubert, Ulf Engel, Elísio Macamo, 2018-07-04. This book uses extractive industry projects in Africa to explore how political authority and the nation state are reconfigured at the intersection of national political contestations and global transnational capital. Instead of focusing on technological zones and the new social assemblages at the actual sites of construction or mineral extraction, the authors use extractive industry projects as a topical lens to investigate contemporary processes of state making at the state corporation nexus. Throughout the book, the authors seek to understand how public political actors and private actors of liberal capitalism negotiate and redefine notions and practices of sovereignty by setting legal, regulatory and fiscal standards. Rather than looking at resource governance from a normative perspective, the authors look at how these negotiations are shaped by and reshape the self-conception of various national and transnational actors and how these jointly redefine the role of the state in managing these processes for the greater good. *Extractive Industries and Changing State Dynamics in Africa* will be useful for researchers, upper-level students and policy makers who are interested in new articulations of state making and politics in Africa.

Part I discusses the meanings of Victorianism, its religious beliefs, sexual attitudes and the hypocrisy of the period. Part II deals with Queen Victoria as legend, woman and monarch. Part III ranges through the trends of thought which formed the intellectual climate of the age: Jeremy Bentham's doctrines, the meaning of Utilitarianism, John Stuart Mill, social and economic reforms, imperialism, the rise of democracy and Darwinism. Part IV is a picture gallery of the great Victorian statesmen, social leaders, reformers, poets and military heroes: Gladstone, Disraeli, Salisbury, Parnell, Edward VII, Ruskin, Tennyson, Kipling, Wolseley and Gordon, and historic episodes such as the Charge of the Light Brigade and the Indian Mutiny. In these striking thumbnail sketches, the author calls a spade a spade.
