Henriksen, 2011 Small group instruction is an important part of elementary literacy programs Methods for forming small groups have often centered on ability level However grouping students by ability can have negative effects on students most at risk for failure It was proposed that a method for forming small groups based on skill or strategy needs rather than ability level may have positive effects on student learning During this study reading growth data in one first grade teacher s class was compared from 2008 09 and 2009 10 school years in which leveled ability groups was used to the 2010 11 school year when the experimental needs based groups were implemented The expected outcome was that students who were grouped by need would experience more consistent growth throughout the first two testing periods than students grouped by ability and that they would show flexible use of reading skills and strategies Student data shows positive effects for some students at risk of failure but no statistically significant effect on student growth Teacher notes provide some insights into possible effects on student use of strategies A Study on how Guided Reading Impacts Student Reading Levels Christine Booker, 2005 **The Next Step Forward in Word Study and Phonics** Jan Richardson, Michele Dufresne, 2019-08-27 Richardson and Dufresne powerhouses in guided reading instruction provide guidance in planning short developmentally appropriate word study and phonics lessons as part of guided reading You ll find all the support you need to teach letters sounds and words effectively including 260 lessons for readers at every
