Guidelines For The Curation Of Archaeological Collections:

Curating Archaeological Collections Lynne P. Sullivan, S. Terry Childs, 2003 An integrated set of seven volumes designed to teach novice archaeologists and students the basics of doing archaeology

Guidelines for the Curation of Archeological Collections, 1993 Using and Curating Archaeological Collections S. Terry Childs, Mark S. Warner, 2020-01-01 All archaeologists have responsibilities to support the collections they produce yet budgeting for and managing collections over the length of a project and beyond is not part of most archaeologists training While this book in the SAA Press Archaeology in Action Series highlights major challenges that archaeologists and curators face with regard to collections it also stresses the values uses and benefits of collections It also demonstrates the continued significance of archaeological collections to the profession tribes and the public and provides critical resources for archaeologists to carry out their responsibilities Many lament that the archaeological record is finite and disappearing In this context collections are even more important to preserve for future use and this book will help all stakeholders do so

The Oxford Handbook of Museum Archaeology Alice Stevenson, 2022-08-25 This Handbook provides a transnational reference point for critical engagements with the legacies of and futures for global archaeological collections It challenges the common misconception that museum archaeology is simply a set of procedures for managing and exhibiting assemblages Instead this volume advances museum archaeology as an area of reflexive research and practice addressing the critical issues of what gets prioritized by and researched in museums by whom how and why Through twenty eight chapters authors problematize and suggest new ways of thinking about historic contemporary and future relationships between archaeological fieldwork and museums as well as the array of institutional and cultural paradigms through which archaeological enquiries are mediated Case studies embrace not just archaeological finds but also archival field notes photographic media archaeological samples and replicas Throughout museum activities are put into dialogue with other aspects of archaeological practice with the aim of situating museum work within a more holistic archaeology that does not privilege excavation or field survey above other aspects of disciplinary engagement These concerns will be grounded in the realities of museums internationally including Latin America Africa Asia Oceania North America and Europe In so doing the common heritage sector refrain best practice is not assumed to solely emanate from developed countries or European philosophies but instead is considered as emerging from and accommodated within local concerns and diverse museum cultures
