FRANK,2021-03-20 The Apple Pencil is an Apple designed stylus that works with the Apple iPad It is called the Apple Pencil because of its resemblance to a traditional pencil although it has a definitive Apple like design It has a small replaceable plastic top that connects to a iPad display a pencil like body for holding and a loading mechanism The original Apple Pencil has a Lightning connector but the second generation model is inductively charged via the iPad Pro Apple pencil is used instead of fingers for precise tasks like writing and sketching and can also be used to navigate the operating system It is great for drawing creating art taking notes and performing similar tasks because it is precise has palm rejection and gives sensitivity to pressure and inclination In short the Apple Pencil is designed to work like a traditional pencil but instead of writing it on paper you write on the PiPad display You can put your right hand on the iPad while typing a feature that has long been impossible for other styles to accurately
