Crate,Mark Nuttall,2016-03-31 The first edition of Anthropology and Climate Change 2009 pioneered the study of climate change through the lens of anthropology covering the relation between human cultures and the environment from prehistoric times to the present This second heavily revised edition brings the material on this rapidly changing field completely up to date with major scholars from around the world mapping out trajectories of research and issuing specific calls for action The new edition introduces new foundational chapters laying out what anthropologists know about climate change today new theoretical and practical perspectives insights gleaned from sociology and international efforts to study and curb climate change making the volume a perfect introductory textbook presents a series of case studies both new case studies and old ones updated and viewed with fresh eyes with the specific purpose of assessing climate trends provides a close look at how climate change is affecting livelihoods especially in the context of economic globalization and the migration of youth from rural to urban areas expands coverage to England the Amazon the Marshall Islands Tanzania and Ethiopia re examines the conclusions and recommendations of the first volume refining our knowledge of what we do and do not know about climate change and what we can do to adapt [Public Health and Disasters](#) Emily Ying Yang Chan,Rajib Shaw,2020-02-24 This book presents the health emergency and disaster risk management H EDRM research landscape with examples from Asia In recent years the intersection of health and disaster risk reduction DRR has emerged as an important interdisciplinary field In several landmark UN agreements adopted in 2015 2016 including the Sendai Framework for Disaster Risk Reduction 2015 2030 the 2030 Sustainable Development Goals SDGs the Paris climate agreement and the New Urban Agenda Habitat III health is acknowledged as an inevitable outcome and a natural goal of disaster risk reduction and the cross over of the two fields is essential for the successful implementation of the Sendai Framework H EDRM has emerged

as an umbrella field that encompasses emergency and disaster medicine DRR humanitarian response community health resilience and health system resilience However this fragmented nascent field has yet to be developed into a coherent discipline Key challenges include redundant research lack of a strategic research agenda limited development of multisectoral and interdisciplinary approaches deficiencies in the science policy practice nexus absence of standardized terminology and insufficient coordination among stakeholders This book provides a timely and invaluable resource for undergraduate and postgraduate students researchers scholars and frontline practitioners as well as policymakers from across the component domains of H EDRM

Climate Security Matti Goldberg, 2023-12-01 This book presents an empirical study of the role of knowledge in the making of the climate security nexus Climate change might give the Soviet Union a competitive advantage in the Cold War Extreme droughts contributed to wars in Darfur Syria or Yemen Melting sea ice creates geopolitical risks Russia's climate destroying hydrocarbons enabled its invasion of Ukraine These are just some of the many ways in which climate change and conflicts have been linked into a climate security nexus In this innovative book Matti Goldberg considers how such connections are constructed and asks to what extent they are driven by evidence and science Goldberg describes the tools used to present the wars of Darfur and Syria as climate wars and considers the fragmented role of the sciences in those presentations as well as the resulting patterns of influence and marginalization of impacted populations The author also highlights how the international community can better integrate the situations of people at the frontlines of climate change into policymaking and based on an analysis of the dynamic nature of power identifies potential entry points for positive change This book is a must read for researchers interested in climate security links in science policy interfaces and in the formation of nexuses of issues in international politics It is also of interest to practitioners working on the climate security nexus and science policy interfaces

A Stratigraphical Basis for the Anthropocene C.N. Waters, J.A. Zalasiewicz, M. Williams, M.A. Ellis, A.M. Snelling, 2014-06-05 Humankind has pervasively influenced the Earth's atmosphere biosphere geosphere hydrosphere and cryosphere arguably to the point of fashioning a new geological epoch the Anthropocene To constrain the Anthropocene as a potential formal unit within the Geological Time Scale a spectrum of indicators of anthropogenically induced environmental change is considered and shown as stratigraphical signals that may be used to characterize an Anthropocene unit and to recognize its base This volume describes a range of evidence that may help to define this potential new time unit and details key signatures that could be used in its definition These signatures include lithostratigraphical novel deposits minerals and mineral magnetism biostratigraphical macro and micro palaeontological successions and human induced trace fossils and chemostratigraphical organic inorganic and radiogenic signatures in deposits speleothems and ice and volcanic eruptions We include finally the suggestion that humans have created a further sphere the technosphere that drives global change

Hydrometeorology Kevin Sene, 2015-12-09 This second edition explores some of the latest techniques used to provide forecasts for a wide range of water related applications in areas such

as floods droughts water resources and environmental impacts The practical uses can range from decisions on whether to issue a flood warning through to providing longer term advice such as on when to plant and harvest crops or how to operate reservoirs for water supply and hydropower schemes It provides an introduction to the topic for practitioners and researchers and useful background for courses in areas such as civil engineering water resources meteorology and hydrology As in the first edition the first section considers topics such as monitoring and forecasting techniques demand forecasting and how forecasts are interpreted when issuing warnings or advice Separate chapters are now included for meteorological and catchment monitoring techniques allowing a more in depth discussion of topics such as weather radar and water quality observations The chapters on meteorological and hydrological forecasting now include a greater emphasis on rainfall forecasting and ensemble and probabilistic techniques Regarding the interpretation of forecasts an updated chapter discusses topics such as approaches to issuing warnings and the use of decision support systems and risk based techniques Given the rapid pace of development in flash flood forecasting techniques flash floods and slower responding riverine floods are now considered in separate chapters This includes more detail on forecasting floods in large river basins and on methods for providing early warnings of debris flows surface water flooding and ice jam and dam break floods Later chapters now include more information on developing areas such as environmental modelling and seasonal flow forecasting As before examples of operational systems are provided throughout and the extensive sets of references which were a feature of the first edition have been revised and updated Key themes floods droughts meteorological observations catchment monitoring meteorological forecasts hydrological forecasts demand forecasts reservoirs water resources water quality decision support data assimilation probabilistic forecasts Kevin Sene is a civil engineer and researcher with wide experience in flood risk management water resources and hydrometeorology He has previously published books on flood warning forecasting and emergency response and flash floods Springer 2008 2013

Carbon Governance, Climate Change and Business

Transformation Adam Bumpus, James Tansey, Blas Luis Pérez Henríquez, Chukwumerije Okereke, 2014-07-17 Transformation to a low carbon economy is a central tenet to any discussion on the solutions to the complex challenges of climate change and energy security Despite advances in policy carbon management and continuing development of clean technology fundamental business transformation has not occurred because of multiple political economic social and organisational issues Carbon Governance Climate Change and Business Transformation is based on leading academic and industry input and three international workshops focused on low carbon transformation in leading climate policy jurisdictions Canada USA and the UK under the international Carbon Governance Project CGP banner The book pulls insights from this innovative collaborative network to identify the policy combinations needed to create transformative change It explores fundamental questions about how governments and the private sector conceptualize the problem of climate change the conditions under which business transformation can genuinely take place and key policy and business innovations needed Broadly the book is based on

emerging theories of multi levelled multi actor carbon governance and applies these ideas to the real world implications for tackling climate change through business transformation Conceptually and empirically this book stimulates both academic discussion and practical business models for low carbon transformation **Realising the 'Triple Dividend of Resilience'**

Swenja Surminski,Thomas Tanner,2016-11-25 Why aren t we investing more in disaster resilience despite the rising costs of disaster events This book argues that decision makers in governments businesses households and development agencies tend to focus on avoiding losses from disasters and perceive the return on investment as uncertain only realised if a somewhat unlikely disaster event actually happens This book develops a new business case for investment based on the multiple dividends of resilience This looks beyond only avoided losses the first dividend to the wider benefits gained independently of whether or not the disaster event occurs These include unleashing entrepreneurial activities and productive investments by lowering the looming threat of losses from disasters and enabling businesses farmers and homeowners to take positive risks the second dividend and co benefits of resilience measures beyond just disaster risk the third dividend such as flood embankments in Bangladesh that double as roads or wetlands in Colombo that reduce urban heat extremes Connecting Mountain Hydroclimate Through the American Cordilleras Alfonso Fernandez,Michel Baraer,Bryan G. Mark,2021-05-18

Adaptation to Climate Change in Asia Sushil Vachani,Jawed Usmani,2014-05-30 The collection of observations and recommendations in this book will prove invaluable to policy makers in countries that are facing similar threats and looking to build their adaptive capacity to cope with climate change It will also appeal to academi **When the Seas Rise** Heather Dewar,University of Florida,2016-05-18 University of Florida has an ambitious goal to harness the power of its faculty staff students and alumni to solve some of society s most pressing problems and to become a resource for the state of Florida the nation and the world Sea levels are rising around the globe and in Florida with its 1 200 miles of coastline and mostly flat topography this is of particular concern The state depends on coastal cities where 75 percent of the population lives and where more than four fifths of its economic activity takes place When economists tally up the likely costs of rising seas they rank Florida as the most vulnerable state in the nation and Miami as one of the most vulnerable major cities in the world When the Seas Rise takes us on an alarming journey from the dying coastal forests where salt killed tree trunks stand like sentinels of a retreating army to the high tide flooded streets of cities from St Augustine to Key West Meet the scientists at the University of Florida researchers in biology geology entomology horticulture urban and regional planning as well as other fields who along with other experts around the state are planning for the sea change already upon us and the greater changes to come They are working around the clock to predict how global climate shifts will affect the state to protect drinking water and slow the effects of flooding to develop new ways to farm to save our butterflies sea turtles Key deer and other endangered creatures to preserve the state s economy and to help coastal dwellers plan future havens for the people and wildlife of Florida The stories chronicled in GATORBYTES span all colleges and units across the UF campus They detail

the far reaching impact of UF s research technologies and innovations and the UF faculty members dedicated to them Gatorbytes describe how UF is continuing to build on its strengths and extend the reach of its efforts so that it can help even more people in even more places Gatekeeping in Transition Timothy Vos,François Heinderyckx,2015-06-08 Much of what journalism scholars thought they knew about gatekeeping about how it is that news turns out the way it does has been called into question by the recent seismic economic and technological shifts in journalism These shifts come with new kinds of gatekeepers new routines of news production new types of news organizations new means for shaping the news and new channels of news distribution Given these changing realities some might ask does gatekeeping still matter In this internationally minded anthology of new gatekeeping research contributors attempt to answer that question Gatekeeping in Transition examines the role of gatekeeping in the twenty first century from organizational institutional and social perspectives across digital and traditional media and argues for its place in contemporary scholarship about news and journalism
