American Labor and the Cold War Robert Cherny, William Issel, Kiernan Walsh Taylor, 2004-07-29 The American labor movement seemed poised on the threshold of unparalleled success at the beginning of the post World War II era Fourteen million strong in 1946 unions represented thirty five percent of non agricultural workers Why then did the gains made between the 1930s and the end of the war produce so few results by the 1960s This collection addresses the history of labor

in the postwar years by exploring the impact of the global contest between the United States and the Soviet Union on American workers and labor unions The essays focus on the actual behavior of Americans in their diverse workplaces and communities during the Cold War Where previous scholarship on labor and the Cold War has overemphasized the importance of the Communist Party the automobile industry and Hollywood this book focuses on politically moderate conservative workers and union leaders the medium sized cities that housed the majority of the population and the Roman Catholic Church These are all original essays that draw upon extensive archival research and some upon oral history sources

**Nonlinear Dynamical Analysis Of The Eeg: Proceedings Of The 2nd Annual Conference** B H Jansen, M E Brandt, 1993-04-27 This volume contains papers contributed by scientists from a wide variety of disciplines on the application of nonlinear dynamics chaos theory in the study of brain function *Behavior and the Natural Environment* Irwin Altman, Joachim F. Wohlwill, 2012-12-06 The theme of the present volume concerns people's response to the natural environment considered at scales varying from that of a house hold plant to that of vast wilderness areas Our decision to focus on this particular segment of the physical environment was prompted in part by the intrinsic interest in this subject on the part of a diverse group of social scientists and professionals and of laypersons for that matter and in part by the relative neglect of this topic in standard treatments of the environment behavior field It also serves to bring out once again the interdisciplinary nature of that field and we are pleased to have been able to include representatives from geography sociology social ecology and natural recreation among our contributors We believe that this volume will serve a useful purpose in helping to integrate the findings and concepts in this presently somewhat fragmented field scattered as they are over a very diverse array of publications representing a similarly varied group of specialties It is hoped that the result will be to stimulate future development of this area and to add a measure of increased coherence to it Volume 7 of our series will be devoted to the theme of elderly people and the environment with M Powell Lawton joining us as guest co editor The titles of the papers comprising Volume 7 are shown on page v Irwin Altman Joachim F Wohlwill ix Contents Introduction *Current Catalog* National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965-70 **Touching Images of Delight and Sorrow** Heinz-Dietrich Fischer, 2021-01-07 This volume presents highly emotional newspaper pictures from 1968-2020 many of them telling moving stories All images were decorated with the Pulitzer Prize for Feature Photography Heinz Dietrich Fischer EdD PhD is Professor Emeritus at the Ruhr University of Bochum Germany [Picture Coverage of the World](#) Heinz Dietrich Fischer, 2011 The Pulitzer Prizes for Press Photography are latecomers within the prestigious award system Established in 1942 during World War II they started with a general category called Photography covering all kinds of photographs After about a quarter century in 1968 this award category was divided into two separate prize groups entitled Spot News Photography and Feature Photography This book presents the decision making processes that lead to the annual Pulitzer Prize winners Additionally in each decision making case one award earning photo is
