Charger 2006 2023 and Challenger 2008 2023 performance cars Over nearly 75 years Chrysler's Dodge and Plymouth
brands have offered some of the most memorable and exciting muscle cars ever loosed on the motoring public Arguably it all
began with the 1951 release of the vaunted V 8 Hemi engine This legendary beast passed through a handful of displacements
until finally morphing into the all conquering 426 Chrysler's V 8 prowess shone in early 1960s factory lightweight drag cars
then moved to muscle era classics like the Charger Roadrunner GTX Super Bee and Superbird But it wasn't just about Hemis
Chrysler offered a variety of V 8 engines including 340 383 and 440 displacements fitted to other top flight cars like the
Barracuda Challenger Cuda and Duster No other Detroit automaker offered a wider variety of performance cars in the 1960
and early 70s Emissions requirements and ever increasing insurance tabs put the squeeze on performance cars beginning in
the mid 1970s and Mopar performance declined for decades But it returned with a vengeance in the 21st century first in the
guise of a new Charger 4 door and then the beloved retro design Challenger Both of these iconic models were put to rest in
2023 but not before unleashing the wild 807 horsepower Dodge Charger SRT Hellcat Redeye and the outrageous 1 025

better meet customer requirements and are most economical to operate This book is more of a how to and a why to rather than a what to guide It stresses systems engineering is an integrated technical managerial process that can be adapted without sacrificing quality in which risk handling and management is a major part It explains that the systems view applies to both the aircraft and the entire air transport system The book emphasizes that system engineering is not an added layer of processes on top of the existing design processes it is the glue that holds all the other processes together The readership includes the aircraft industry suppliers and regulatory communities especially technical program and procurement managers systems design and specialty engineers human factors reliability safety etc students of aeronautical and systems engineering and technical management and government agencies such as FAA and JAA
