Bibliography of Scientific and Industrial Reports ,1946 **The Brain in Search of Itself** Benjamin Ehrlich,2022-03-15 Passionate and meticulous Ehrlich delivers thought provoking metaphors unforgettable scenes and many beautifully worded phrases Benjamin Labatut The New York Times Book Review One of The Telegraph s best books of the year The first major biography of the Nobel Prize winning scientist who discovered neurons and transformed our understanding of the human mind illustrated with his extraordinary anatomical drawings Unless you re a neuroscientist Santiago Ram n y Cajal is likely the most important figure in the history of biology you ve never heard of Along with Charles Darwin and Louis Pasteur he ranks among the most brilliant and original biologists of the nineteenth century and his discoveries have done for our understanding of the human brain what the work of Galileo and Sir Isaac Newton did for our conception of the physical universe He was awarded the Nobel Prize in 1906 for his lifelong investigation of the structure of neurons The mysterious butterflies of the soul Cajal called them whose beating of wings may one day reveal to us the secrets of the mind And he produced a dazzling oeuvre of anatomical drawings whose alien beauty grace the pages of medical textbooks and the walls of museums to this day Benjamin Ehrlich s The Brain in Search of Itself is the first major biography in English of this singular figure whose scientific odyssey mirrored the rocky journey of his beloved homeland of Spain into the twentieth century Born into relative poverty in a mountaintop hamlet Cajal was an enterprising and unruly child whose ambitions were both nurtured

and thwarted by his father a country doctor with a flinty disposition A portrait of a nation as well a biography The Brain in Search of Itself follows Cajal from the hinterlands to Barcelona and Madrid where he became an illustrious figure resisting and ultimately transforming the rigid hierarchies and underdeveloped science that surrounded him To momentous effect Cajal devised a theory that was as controversial in his own time as it is universal in ours that the nervous system is comprised of individual cells with distinctive roles just like any other organ in the body In one of the greatest scientific rivalries in history he argued his case against Camillo Golgi and prevailed In our age of neuro imaging and investigations into the neural basis of the mind Cajal is the artistic and scientific forefather we must get to know The Brain in Search of Itself is at once the story of how the brain as we know it came into being and a finely wrought portrait of an individual as fantastical and complex as the subject to which he devoted his life *Escribir en el contexto académico* Inmaculada Ballano (Coord.), Itziar Muñoz (Coord.), 2014-12-22

En un mundo cada vez más interconectado y complejo las fronteras entre disciplinas académicas se tornan difusas emergiendo nuevos espacios de diálogo y colaboración y las disciplinas humanísticas tienen un papel crucial que desempeñar Este libro que presentamos aquí Cruce de caminos visiones interdisciplinares en las ciencias sociales y humanidades se presenta como un testimonio de esta evolución intelectual y cultural abordando la imperiosa necesidad de un diálogo interdisciplinario en el análisis de problemas sociales culturales y humanos contemporáneos Este volumen reúne a hombres y mujeres de diversas disciplinas para explorar cómo la colaboración entre áreas del saber puede enriquecer nuestra comprensión del mundo y responder a las preguntas más apremiantes de nuestra era Al entrelazar perspectivas académicas e intelectuales muy variadas este libro despliega un rico tapiz de ideas que refleja la pluralidad de visiones y la complejidad del pensamiento contemporáneo
