but huge differences in achievement still result. If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education. The book is written by a group of experienced collaborating researchers who share this focus. It is written for researchers, research students, teachers and in-service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy, ones that take for granted the positive values of diversity. Several chapters report new research in this direction. The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne, Australia. The chapters all focus on the ideas of development in both research and practice, recognising that the current need is for new inclusive approaches. The studies presented are set in different contexts including Australia, China, the United States and Singapore.

Combinatorial Algorithms Ljiljana Brankovic, Joe Ryan, William F. Smyth, 2018-04-19. This book constitutes the refereed post-conference proceedings of the 28th International Workshop on Combinatorial Algorithms, IWOCA 2017, held in Newcastle, NSW, Australia, in July 2017. The 30 regular papers presented in this volume, together with 5 invited talks, were carefully reviewed and selected from 55 submissions. They were organized in topical sessions named: approximation algorithms and hardness, computational complexity, computational geometry, graphs and combinatorics, graph colourings, labellings and power domination, heuristics, mixed integer programming, polynomial algorithms, privacy and string algorithms.
