Implementation and Critical Assessment of the Flipped Classroom Experience Scheg, Abigail G.,2015-01-31 In the past decade traditional classroom teaching models have been transformed in order to better promote active learning and learner engagement Implementation and Critical Assessment of the Flipped Classroom Experience seeks to capture the momentum of non traditional teaching methods and provide a necessary resource for individuals who are interested in taking advantage of this pedagogical endeavor Using narrative explanations and foundation materials provided by experienced instructors this premier reference work presents the benefits and challenges of flipped methodology implementation in today s classroom to educators and educational administrators across all disciplines and levels *Non-Linear Perspectives on Teacher Development* Kathryn J. Strom,Tammy Mills,Linda Abrams,2023-03-21 Despite the multifaceted complexity of teaching dominant perspectives conceptualize teacher development in linear dualistic transactional human centric ways The authors in this book offer non linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory actor network theory indigenous studies rhizomatics and posthuman neomaterialisms The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice They also present situated illustrations of what those entanglements or assemblages look like in the preservice induction and inservice phases from early childhood to secondary settings and across multiple continents Authors provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking assets based pedagogies Methodologically the chapters encourage conceptual creativity and expansion and support an argument for blurring theory method and normalising methodological hybridity Ultimately this book provides conceptual theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise It was originally published as a special issue of the journal Professional Development in Education **Constructing Meaning in a Science Methods Course for Prospective Elementary Teachers** Barbara S. Spector,2016-02-10 How do prospective elementary science teachers think This case study reveals thinking patterns common to preservice elementary teachers identifies their behavioral characteristics while learning to teach science which are not commonly noted in current literature provides change strategies to accelerate preservice elementary teachers embracing the holistic constructivist inquiry practice based paradigm consistent with the standards set by the curriculum The chapters in this book immerse the reader in a sequence of episodes in this science methods course and reveal the adventure of turning theory into practice while analyzing student student student instructor interactions and their outcomes in an inquiry driven flipped classroom Strategies presented

empower preservice elementary teachers to implement national and state standards change science learning teaching from business as usual to applying science and engineering practices in the classroom make cognitive and behavioral changes required to shift paradigms and eliminate science anxiety pass through stages of grief inherent in the loss of dominant mechanistic paradigm This book will interest a wide readership including science educators scientists and engineers administrators supervisors and elementary teachers in a clinical education setting preservice elementary teachers and anyone seeking to improve STEM education in elementary schools

Bad at Math? Lidia Gonzalez, 2023-02-03 Math really is for everyone so let's prove it You've heard it from kids from friends and from celebrities I'm bad at math It's a line that society tends to accept without examination after all some people just aren't math people right Wrong As we do with other essential skills we need to expose the stereotypes challenge the negative mindsets and finally confront the systemic opportunity gaps in math education and replace them with a new vision for what math is who it's for and who can excel at it In this book you'll find Research on teacher and student mindsets and their effect on student achievement Audience specific and differentiated tools reflection questions and suggested actions for educators at all levels of the system Examples from popular media as well as personal stories and anecdotes Quotes data driven figures and suggestions for deeper learning on all aspects of a positive and equitable vision of math education Both social commentary and a toolkit of solutions this bold new book directly challenges the constructs that have historically dictated our perceptions of what makes someone a math person Only by dismantling those misplaced assumptions can we reform math education so it works for everyone Because in truth we are all math people

Indigenous Innovation Elizabeth Sumida Huaman, Bharath Sriraman, 2015-10-30 Rooted in diverse cultures and in distinct regions of the world Indigenous people have for generations created maintained and negotiated clear and explicit relationships with their environments Despite numerous historical disruptions and steady iterations of imperialism that continue through today Indigenous communities embody communities of struggle resistance and intense vitality creativity In this work a fellowship of Indigenous research has emerged and our collective intent is to share critical narratives that link together Indigenous worldviews culturally based notions of ecology and educational practices in places and times where human relationships with the world that are restorative transformative and just are being sought
