The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinothan Naidoo, 2018-09-05 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. The Politics and Governance of Basic Education explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Air Traffic Management Marina Efthymiou, 2023-05-10 This book addresses each of the Air Navigation Services' five broad categories of services provided to air traffic during all phases of operation: air traffic management, ATM, communication, navigation, and surveillance services; CNS meteorological services for air navigation; MET aeronautical information services; AIS and search and rescue SAR. This book is designed for working professionals in Air Transport Management but also undergraduate and postgraduate students studying air transport management and aeronautical engineering. It will also be very helpful for the training of air traffic control officers (ATCOs). The book does not require any prior specialist knowledge as it is an introduction to air navigation service provider (ANSP) business. There is very little literature available that gives a detailed appreciation of the complexities, potential risks, and issues associated with the provision of air navigation services. The role of this book is to fill this significant gap with a comprehensive in-depth study of the management principles related to ANSPs. This is particularly timely given recent ATC developments in Europe, USA, and New Zealand. Airlines and airports rely on the ANSPs for the management of air traffic. Hence, air navigation services (ANS) provision is considered as a core element for air transportation.
