Big Data and High Performance Computing L. Grandinetti, G.R. Joubert, M. Kunze, 2015-10-20 Big Data has been much in the news in recent years and the advantages conferred by the collection and analysis of large datasets in fields such as marketing medicine and finance have led to claims that almost any real world problem could be solved if sufficient data were available This is of course a very simplistic view and the usefulness of collecting processing and storing large datasets must always be seen in terms of the communication processing and storage capabilities of the computing platforms available This book presents papers from the International Research Workshop Advanced High Performance Computing Systems held in Cetraro Italy in July 2014 The papers selected for publication here discuss fundamental aspects of the definition of Big Data as well as considerations from practice where complex datasets are collected processed and stored The concepts problems methodologies and solutions presented are of much more general applicability than may be suggested by the particular application areas considered As a result the book will be of interest to all those whose work involves the processing of very large data sets exascale computing and the emerging fields of data science

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand

that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people **Reclaiming Lesson Observation** Matt O'Leary,2016-09-19
