Medicine in the Talmud Jason Sion Mokhtarian, 2022-07-12 Despite the Talmud being the richest repository of medical remedies in ancient Judaism this important strain of Jewish thought has been largely ignored even as the study of ancient medicine has exploded in recent years In a comprehensive study of this topic Jason Sion Mokhtarian recuperates this obscure genre of Talmudic text which has been marginalized in the Jewish tradition since the Middle Ages to reveal the unexpected depth of the rabbis medical knowledge *Medicine in the Talmud* argues that these therapies represent a form of rabbinic scientific rationality that relied on human observation and the use of nature while downplaying the role of God and the Torah in health and illness Drawing from a wide range of both Jewish and Sasanian sources from the Bible the Talmud and Maimonides to texts written in Akkadian Syriac and Mandaic as well as the incantation bowls Mokhtarian offers rare insight into how the rabbis of late antique Babylonia adapted the medical knowledge of their time to address the needs of their community In the process he narrates an untold chapter in the history of ancient medicine

The Sacred Science Nick Polizzi, 2019-03-05 In 2010 Nick Polizzi did something unimaginable He assembled a group of eight desperately ill patients from around the world and brought them into the heart of the Amazon rainforest to put the mysterious medicines of native shamans to the test The healing journey that unfolded would change their lives and his own forever In *The Sacred Science* we join Nick as he explores these primordial traditions and learns firsthand what it takes to truly heal ourselves of physical disease emotional trauma and the sense of lostness that so many of

destructive habits This book is based on six years of ethnographic research on changing practices in the identification and classification of natural species Informed both by Science and Technology Studies STS and the anthropology of science the authors analyse DNA barcoding in the context of a sense of crisis concerning global biodiversity loss but also the felt inadequacy of taxonomic science to address such loss The authors chart the specific changes that this innovation is propelling in the collecting organizing analyzing and archiving of biological specimens and biodiversity data As they do so they highlight the many questions ambiguities and contradictions that accompany the quest to create a genomics based environmental technoscience dedicated to biodiversity protection They ask what it might mean to recognise ambiguity contradiction and excess more publicly as a constitutive part of this and other genomic technosciences Barcoding Nature will be of interest to students and scholars of sociology of science science and technology studies politics of the environment genomics and post genomics philosophy and history of biology and the anthropology of science SEJ Journal ,2000
