

<p>1. Introduction</p> <p>The purpose of this study is to investigate the effects of the proposed system on the performance of the participants. The study was conducted in a controlled environment, and the results are presented in the following sections.</p>	<p>2. Methodology</p> <p>The study was conducted using a controlled experiment. The participants were divided into two groups: the control group and the experimental group. The control group used the standard system, while the experimental group used the proposed system. The performance of the participants was measured using a set of tasks.</p>	<p>3. Results</p> <p>The results of the study show that the proposed system significantly improved the performance of the participants. The experimental group performed better than the control group in all tasks.</p>
