Sinclair, 2017-07-05 This book suggests that religion in its usual sense can be replaced by something better that the human
spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap
but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can The book
breaks new ground in suggesting a radical alternative to religion It offers a scientific and humanist alternative to religion
which appeals to people s critical faculties rather than emotions or intuitions It also challenges current views of causation
and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to
an independent external reality It develops and elaborates a notion of the noosphere within a theoretical system this enables
the notion to assume a scientific importance which it currently lacks because it is treated as an isolated eccentric and rather
mystical idea *The Science Teacher* , 1987 **Books in Print** , 1981 Resources in Education , 1972 **Paperbacks in**
