Rationalist Bias in Communication Theory Shedletsky, Leonard,2021-06-04 While communication theory has not recognized the implications of the social intuitionist model psychologists have gathered an impressive body of evidence to support the theory In social cognition research there was the idea that human inferential processes are conscious rational logical and accurate and this belief continues somewhat in the behavioral sciences although there is evidence that it is incorrect A fresh examination is needed on just how these inferences by the receiver and the

implications by the sender carried out at high speed impact our understanding of the communication process Simply put until now the default case in communication theory is the belief that we consciously reason and then we act However that may not be entirely true Rationalist Bias in Communication Theory applies social intuition theory to human communication This book explores how research has missed accounting for a critical fact about human communication in the theories of communication namely that we as humans can respond to one another and to all kinds of stimuli faster than we can deliberate By applying intuitive cognition to communication a new light can be shed on the communication process which is what the chapters prove and discuss This book is valuable for social scientists practitioners researchers academicians and students interested in new theories in communication theory

Metamodern Leadership James Surwillo,2017-07-11 Metamodern Leadership outlines the seven values that identify the character of our future leaders based on the circumstances that make the Millennial Generation who they are It is at once an attempt to implore youth to seize their potential by tying their values to ancient wisdom as well as a warning to everyone else to understand the impacts of disregarding the inevitable tendencies of a very distinct new demographic This is the untold story of the personal responsibility required of the Millennial Generation against the messaging and memes that portray them as entitled and lazy It is an optimistic and pragmatic interpretation on the leadership mandates in the near future The ancient virtue of leadership required broad knowledge as the basis for critical thinking and self examination The late twentieth century required myopic versions of leadership which neglected the truths of centuries of wisdom Our younger generations will lead and follow based on new foundations that seem counterintuitive to most yet will be the status quo within a decade This distinction will lead to pragmatism and problem solving for the future rather than the dogma and gridlock of today We will require a generation of leaders who can once again link the complexities of the future with the ancient wisdom of progress
