Geography Alan Rodgers, Angella Streluk, 2002. This handbook demonstrates how computers can effectively contribute to the teaching of geography. It also offers general advice on generic software, key processes and skills in ICT, the role of the coordinator, and making the most of the Internet.

Science and Religion Paul Kurtz, 2013-06-24. In recent years, a noticeable trend toward harmonizing the distinct worldviews of science and religion has become increasingly popular. Despite marked public interest, many leading scientists remain skeptical that there is much common ground between scientific knowledge and religious belief. Indeed, they are often antagonistic. Can an accommodation be reached after centuries of conflict? In this stimulating collection of articles on the subject, Paul Kurtz, with the assistance of Barry Karr and Ranjit Sandhu, have assembled the thoughts of scientists from various disciplines. Among the distinguished contributors are Sir Arthur C. Clarke, author of 2001: A Space Odyssey and numerous other works of science fiction; Nobel Prize Laureate Steven Weinberg, professor of physics at the University of Texas at Austin; Neil deGrasse Tyson, Princeton University astrophysicist and director of the Hayden Planetarium; James Lovelock, creator of the Gaia hypothesis; Kendrick Frazier, editor of the Skeptical Inquirer; Steven Pinker, professor of psychology at MIT; Richard Dawkins, zoologist at Oxford University; Eugenie Scott, physical anthropologist and executive director of the National Center for Science Education; Owen Gingerich, professor of astronomy at Harvard University; Martin Gardner, prolific popular science writer; the late Richard Feynman, Nobel Prize-winning physicist; and Stephen Jay Gould, professor of geology at Harvard University, and many other eminent scientists and scholars. Among the topics discussed are the Big Bang and the origin of the universe; intelligent design and creationism versus evolution; the nature of the soul; near-death experiences; communication with the dead; why people do or do not believe in God; and the relationship between religion and ethics.

Me and My Cat Carmel Reilly, 2012-08-01. Every cat owner believes that his or her cat understands them. Every cat owner believes that cats are far more intelligent than dogs; they're just too cool to show it. Every cat owner believes that their cat should be starring in TV commercials. Every cat owner, in short, is a cat lover. If you're not a cat lover when the cat first comes along, you don't purchase a cat; they choose to live with you, then you will be within a very short space of time. There are stories, of course, that every cat owner loves to tell. It may be how the cat comforted them on the day a relative died unexpectedly. It may be about how the cat stares down urban foxes in the garden. It may be a story

of the cat's escapades or how it got stuck up a tree. It may simply be a story about how the cat is a loving companion. From editor Carmel Reilly, author of numerous collections of inspirational stories including *True Tales of Angel Encounters*, comes this delightful anthology of tales about beloved cats and the joy they bring to human lives. Each story is a different cat owner's tribute to his or her favorite feline and each falls into a special category from *Cats with Attitude* to *Kitten Escapades* from *Magical Cats* to tales about *Cats Nine Lives*. You'll read about cats that ward off unwanted visitors, cats that hoard silver jewelry, and cats that get stuck in tubs of yogurt. Accompanied by twenty-five charming illustrations and told with warmth, humor, and affection, *Me and My Cat* is an ideal gift for the cat lover in your life and a perfect book to curl up with next to a furry friend. Why do we think that things happen in the way that they do? Why do we think that some things are beautiful and other things ugly? Why do we think that some things are good and other things evil? Why do we think that some things are true and other things false? These are old and traditional questions. In the past, they have been answered by separating our emotional from our rational responses. But recent work in the neurosciences suggests that the questions now deserve very different answers. In his fascinating and original new book, John Bowker shows that reason and emotion work much more closely together in forming human opinions and judgements than has previously been supposed. This discovery has stunning implications for the increasingly dangerous relationship between different religions and cultures, and also for the human sense of God. *The Sacred Neuron* is a masterful survey of some key topics in science and religion, which will be sure to amaze and delight the author's many admirers. Whether goodness will survive modernity is one of the most urgent questions of our age. In this lucid and erudite work, John Bowker discovers the surprising outlines of an answer. Bryan Appleyard, author and journalist. Never was a book more timely for the world. Just when it seems that moral absolutes have either been swept away or have staged a frightening and unyielding comeback, John Bowker steps forward to explain how we can find some sure footing in the world of aesthetic and moral ambiguities. Citing the latest scientific research and drawing on cultural references that range from Stravinsky to Bertrand Russell and from George Orwell to John Betjeman, he offers us new insights into how we can claim something is

beautiful or something is good Then with meticulous scholarship he traces the origin of religions in the human community and explains how and why the need for them persists The Sacred Neuron is a seriously impressive book Joan Bakewell writer and broadcaster Scholarship of this quality is so rare particularly in the domain of science and religion Bowker s discussion of truth and its relevance to an understanding of the world s religions and the animosities between them is replete with a poignant wisdom born of his great understanding of so many religious traditions The Sacred Neuron is an eloquent testimony to the value of informed interdisciplinary reflection John Hedley Brooke Andreas Idreos Professor of Science and Religion University of Oxford The Sacred Neuron is a rare mixture of intellectual religious aesthetic and ethical history and theology all enhanced by John Bowker s special compound of meticulous scholarship and deep faith The book is brave and broad Reading it mingles fascination with pleasure Peter Hennessy Attlee Professor of Contemporary History Queen Mary University of London The Sacred Neuron is one of the first books to take seriously the impact of modern neuroscience on how our perception of the external world must affect our understanding of emotion rationality ethics and religion With great charm and humour and with extraordinary breadth of scholarship Bowker shows how religious experience might be said to have meaning in the twenty first century His book will become a classic Mark Williams Professor of Clinical Psychology University of Oxford
