The C 372 is the latest in NAD's range of affordably priced, yet very high performance Integrated Amplifiers. Building on the strengths of our highly acclaimed C 370 (Winner of the 2002 EISA Award for Amplifier of the year, Stereophile Recommended Component, What Hi-Fi Five Star rated, and many others), the C 372 boasts many upgrades and refinements.

Immediately noticeable is the new cosmetic appearance along with the improved SR-S remote control handset. Inside, we've upgraded the Pure Class A preamp and driver stage modules using the latest high performance semi-conductors. The power supply has also received a complete upgrade, with the larger custom wound toroidal transformer and 105C smoothing capacitors contributing to a 20% increase in output power, to 150 watts continuous. An improved tone control circuit and revised PCB layout has reduced distortion and noise to unprecedented levels. Taken together, these improvements mark a sharp upturn in performance that simply must be heard, to be fully appreciated!

Features:

The C 372 is fully remote controlled and comes supplied with the all-new NAD SR-S system remote control. The remote control features an ergonomic form, with large buttons that are differentiated by shape and position, to make operation intuitive and enjoyable. The SR-S will also operate many other NAD products such as CD players, tuners, etc.

Flexibility is another NAD strong point. The C 372 has 7 line inputs (including 2 tape in/outputs with dubbing facility) and the pre-amplifier section can be separated from the power amplifier for easy upgrades or adding ancillary equipment. Thus the C 372 can be expanded to meet future system needs. The C 372 sports 2 pre-amp outputs: Many systems benefit from the use of multiple power amplifiers for "Bi-Amping" (using separate power amplifiers to drive the bass and treble section of a loudspeaker). With the second Preout 2 facility an extra power amplifier, such as NAD's C 272, is easily connected. There is an adjustable gain setting for this second Preout 2, allowing virtually any amplifier to work with the C 372. This output can also be used to connect a powered subwoofer, an increasingly popular option.

For remote on/off switching of ancillary components in a system, such as power amplifiers or active speakers, the C 372 is equipped with a 12V trigger system. When switching the amplifier on, the 12V trigger output is also activated which in turn can activate a 12V trigger input and switch on the remote devices. Besides the 12V trigger, the C 372 also has an AC switched outlet (North American version only) so you can easily switch your entire system on or off with the remote control or from the front panel. It is fashionable to omit tone controls nowadays, however, provided that the tone controls are properly designed, they can be really useful tools in making improvements to the overall sound. The C 372 tone controls only work at the frequency extremes leaving the critical mid-band essentially unaltered. The tone control circuits can be completely bypassed by using the tone defeat switch. The C 372 also incorporates NAD's acclaimed switchable "Soft Clipping" circuit, which significantly reduces the risk of damage to loudspeakers due to prolonged high power operation.
