cloud and security administrators CEOs CIOs and other business professionals *Emerging Security Threats in the Middle East* Ashok Swain,Anders Jägerskog,2016-04-12 Increasingly the Middle East and its growing population face a highly complex and fragile security system The rich deposits of natural resources such as oil and gas suffer from a strained renewable resource base that includes water and arable land This leads to water scarcity desertification and land degradation Increasing population industrialization and urbanization put more and more demand on the food supply Energy insecurity may not be generally associated with the Middle East but the countries in the eastern Mediterranean part have been traditionally vulnerable to it as their fossil fuel endowments have been low Another issue is the large scale temporary labor migration and the large number of forced migrants refugees and internally displaced persons The book analyzes these emerging security challenges in a comprehensive and systematic manner It draws national and regional security issues into both the global security and human security perspectives 网络安全 2017 网络安全, **Botnets** Heli

Tiirmaa-Klaar,Jan Gassen,Elmar Gerhards-Padilla,Peter Martini,2013-06-29 Malware poses one of the major threats to all currently operated computer systems The scale of the problem becomes obvious by looking at the global economic loss caused by different kinds of malware which is estimated to be more than US 10 billion every year Botnets a special kind of malware are used to reap economic gains by criminals as well as for politically motivated activities In contrast to other kinds of malware botnets utilize a hidden communication channel to receive commands from their operator and communicate their current status The ability to execute almost arbitrary commands on the infected machines makes botnets a general purpose tool to perform malicious cyber activities Botnets provides a comprehensive analysis of the topic and comprises both technical and non technical sections written by leading cybersecurity experts The non technical section addresses how botnet infrastructure could be exploited for national security and cybercrime purposes It approaches the subject as a public policy issue and analyzes the phenomenon of botnets from national security law enforcement and regulatory policy perspectives and makes recommendations for policy makers on different public policies highlighting the need for international response mechanisms The technical section provides insight into current botnet techniques and discusses state of the art countermeasures to combat the botnet threat in detail It includes new detection methods as well as different approaches to actively compromise running botnets *Cyberwarfare* Kristan Stoddart,2022-11-18 This book provides a detailed

examination of the threats and dangers facing the West at the far end of the cybersecurity spectrum It concentrates on threats to critical infrastructure which includes major public utilities It focusses on the threats posed by the two most potent adversaries competitors to the West Russia and China whilst considering threats posed by Iran and North Korea The arguments and themes are empirically driven but are also driven by the need to evolve the nascent debate on cyberwarfare and conceptions of cyberwar This book seeks to progress both conceptions and define them more tightly This accessibly written book speaks to those interested in cybersecurity international relations and international security law criminology

psychology as well as to the technical cybersecurity community those in industry governments policing law making and law enforcement and in militaries particularly NATO members

CHALLENGES TO SECURITY POLICIES IN A DIGITAL ENVIRONMENT Daniela Georgiana Golea, 2025-09-06 The book explores the transformation of national security policies in the context of a rapidly evolving digital environment with a comparative focus on Romania and Bulgaria Anchored in political science the research examines how these two NATO and EU member states adapt their cybersecurity governance to increasing threats including state sponsored attacks organized cybercrime hybrid warfare and disinformation campaigns Covering the period 2018 2025 the study employs qualitative and comparative methodologies to assess institutional resilience legal frameworks and public policy responses Findings reveal critical asymmetries legislative gaps and limited cross sector coordination The dissertation also integrates a geopolitical dimension linking digital threats with regional instability especially the war in Ukraine and strategic vulnerabilities along NATO's eastern flank It emphasizes the need for democratic accountability in cybersecurity policymaking and proposes adaptive strategies for national and regional cooperation By conceptualizing cybersecurity as a central pillar of national security the research offers theoretical and practical contributions that enrich political science and inform public policy design in digitally exposed democracies
