- 1) **Thompson (1984) defines five categories** for the process of spreading diffusion from the origin. **Source** is the starting location; **transmission** is what the person who carries the information is doing; **link** is the path; **target** is the person or place that receives the information; **flow** is the speed of the information transfer. **The original source and spreading medium is the only way to spread your information** (person, place, message, format).
- 2) **Thompson (1984) describes diffusion as** a process on the **frontier** or **edge** of the epidemic. **It is not necessary that there is a threshold** for the spread of information (epidemiological).
- 3) **Media that spread information** in the context of your needs opens up the **flow** between the **spatial** (people) and **temporal** (time) dimensions of the epidemic.
- 4) **Person space** results in a **spread** of people space to a **spatial** level (e.g., **concentrations** can go up or down).
- 5) **Media that spread information** and **change** from **spatial** to **temporal** level (e.g., **radio**, **television**, **telematics**, **teleshopping**, **teleshows**).
- 6) **Temporal** media can spread information **from the future** to **contemporaries** in the **present**. **They are** **temporal** media **because** they **change** from **spatial** to **temporal** level (e.g., **radio**, **television**, **telematics**, **teleshopping**, **teleshows**).
