- 1.1 Which of the following pairs of compounds contains members of the same homologous series?
- A Ethanol and butane
 B Ethanol and ethanoic acid
 C Ethanol and propanal
 D Ethanol and propanone
- 1.2 In which of the following cases would the resultant force acting on an object be equal to 0N.

- A A constant number of different ions are involved.
 B Aqueous solution of a substance just dissolves in water and does not react.
 C An ionic substance forms a precipitate when mixed with another solution.
 D An ionic compound is made by neutralisation.
- 1.3 Which of the statements below best describes Weightlessness?
- A An object is free of contact forces and is in free fall.
 B An object is moving in a circle at a constant speed but is not accelerating.
 C An object is in a state of free fall where the only force acting on it is the force of gravity.
 D An object is in a state of free fall where the only force acting on it is the force of gravity.
- 1.4 The inertia of an object...
- A is measured by its mass and weight.
 B is the resistance to applied force in the opposite direction.
 C is the resistance to acceleration in the direction of motion.
 D increases as the frictional force on the object increases.

- 1.5 An astronaut has a weight E_E on Earth. What distance, in terms of the radius of the Earth (r), will the astronaut be if his weight is a 14 of his weight (E_E) on the surface of the Earth?
- A r
 B $2r$
 C $3r$
 D $4r$

- 1.6 A box is pushed forward with a force of 100N but does not move. A possible reason for this is that:
- A Frictional force is zero.
 B Frictional force is more than 100N.
 C Frictional force is less than 100N.
 D None of the above.
- 1.7 A box is pushed forward with a force of 100N but does not move. A possible reason for this is that:
- A Frictional force is zero.
 B Frictional force is more than 100N.
 C Frictional force is less than 100N.
 D None of the above.

The End of Public Schools David W. Hursh, 2015-10-16 The End of Public Schools analyzes the effect of foundations corporations and non governmental organizations on the rise of neoliberal principles in public education By first contextualizing the privatization of education within the context of a larger educational crisis and with particular emphasis on the Gates Foundation and influential state and national politicians it describes how specific policies that limit public control are advanced across all levels Informed by a thorough understanding of issues such as standardized testing teacher tenure and charter schools David Hursh provides a political and pedagogical critique of the current school reform movement as well details about the increasing resistance efforts on the part of parents teachers and the general public

Flow and Transformations in Porous Media Renaud Toussaint, Bjørnar Sandnes, Daniel Koehn, Piotr Szymczak, Einat Aharonov, 2017-02-07 Fluid flow in transforming porous rocks fracture networks and granular media is a very active interdisciplinary research subject in Physics Earth Sciences and Engineering Examples of natural and engineered processes include hydrocarbon recovery carbon dioxide geo sequestration soil drying and wetting pollution remediation soil liquefaction landslides dynamics of wet or dry granular media dynamics of faulting or friction volcanic eruptions gas venting

in sediments karst development and speleogenesis ore deposit development and radioactive waste disposal Hydrodynamic flow instabilities and pore scale disorder typically result in complex flow patterning In transforming media additional mechanisms come into play compaction de compaction erosion segregation and fracturing lead to changes in permeability over time Dissolution precipitation and chemical reactions between solutes and solids may gradually alter the composition and structure of the solid matrix either creating or destroying permeable paths for fluid flow A complex dynamic feedback thus arises where on the one hand the fluid flow affects the characteristics of the porous medium and on the other hand the changing medium influences the fluid flow This Research Topic Ebook presents current research illustrating the depth and breadth of ongoing work in the field of flow and transformation in porous media through 15 papers by 72 authors from around the world The body of work highlights the challenges posed by the vast range of length and time scales over which subsurface flow processes occur Importantly phenomena from each scale contribute to the larger scale behavior The flow of oil and gas in reservoirs and the flow of groundwater on catchment scale is sensitively linked to pore scale processes and material heterogeneity down to the micrometer scale The geological features of the same reservoirs and catchments evolved over millions of years sometimes as a consequence of cracking and fracture growth occurring on the time scale of microseconds The research presented by the authors of this Research Topic represents a step toward bridging the separation of scales as well as the separation of scientific disciplines so that a more unified picture of flow and transformation in porous media can start to emerge

Signal ,2014 Analysis of Creationism in the United States from Scopes (1925) to Kitzmiller (2005) and its Effect on the Nation's Science Education System Elizabeth Watts,2018 Creationism is based on a fundamental belief in the inerrancy of the bible and negatively affects science education because creationist proponents insist on the inclusion of supernatural explanations for the appearance of species in particular the origin of humans This detrimental effect on education is particularly relevant in the United States where almost 70% of the population rejects the idea of naturalistic evolution and the majority of American students struggle to meet the college readiness benchmarks in science and math This dissertation provides a comprehensive look at the issue from historical judicial and educational perspectives Twenty four legal cases in the United States regarding anti evolutionary strategies were analyzed in detail Strategic trends were identified ranging from the statewide banning of evolution in public schools to the required teaching of Creation Science The exact effect of creationist political activity was discerned through the analysis of state science standards and textbook adoption processes which illustrated the creationists ability to lobby for a diminished coverage of evolution in science standards and textbooks It was found that despite attempts made by scientific and educational agencies to provide guidelines such as the Next Generation Science Standards the majority of American state science standards continue to be sub par and one of the major flaws of these standards is the overall attempt to weaken the coverage of evolution throughout the standards A similar loss of quality occurs in textbooks since publishers engage in self censorship in

order to avoid controversial topics such as evolution in order to prevent their books from being rejected An examination of the free choice learning materials revealed that creationist proponents are very active and successful in producing books films and museums for the sole purpose of promoting creationism Moreover a brief look at the creationist movement in Germany provided a powerful comparison to the United States and elucidated the key components necessary for a creationist movement to exist and flourish namely the presence of fundamentalist willing to fight to get anti evolutionary materials introduced into science classrooms This study provides new insights into the creationist phenomenon present not only in the United States but also increasingly present in European countries such as Germany Understanding the detrimental link between creationism and science education will help the science community realize that this topic needs to be continually readdressed and that it is imperative that these creationist trends are not dismissed as inconsequential **Understanding**
