The Ukrainian Crisis Tracey

German, Emmanuel Karagiannis, 2018-12-07 The conflict in eastern Ukraine continues with little sign of a negotiated resolution Crimea has been absorbed into the Russian Federation and celebrates the third anniversary of its integration in March 2017 The ongoing nature of the conflict contrasts with a lack of academic exploration of the issues surrounding it To date most analyses have focused on the geopolitical implications of the Ukrainian crisis such as the impact on NATO Russia

relations and foreign policy responses to the crisis from a variety of state and supranational actors including the EU and Russia The role of sub state and non state actors and implications for them has been largely overlooked This volume seeks to rectify this by examining a wide array of non state and sub state actors that have both played a role in the conflict in Ukraine and been indirectly impacted by it Introduction to Regional Economic Development Mustafa Dinc,2015-12-18 This is a relatively simple and easy to read introduction of major regional and local economic development theories their theoretical evolution and other relevant topics such as governance institutions and local leadership within the globalization context It also discusses some basic analytical tools and provides a template for them in an easy to use MS Excel spreadsheet application It introduces conflict management procedures into regional development process and provides a regional decision support framework *Applied Data Analysis for Urban Planning and Management* Alasdair Rae,Cecilia Wong,2021-09-08 This book showcases the different ways in which contemporary forms of data analysis are being used in urban planning and management It highlights the emerging possibilities that city regional governance technology and data have for better planning and urban management and discusses how you can apply them to your research Including perspectives from across the globe it s packed with examples of good practice and helps to demystify the process of using big and open data Learn about different kinds of emergent data sources and how they are processed visualised and presented Understand how spatial analysis and GIS are used in city planning See examples of how contemporary data analytics methods are being applied in a variety of contexts such as smart city management and megacities Aimed at upper undergraduate and postgraduate students studying spatial analysis and planning this timely text is the perfect companion to enable you to apply data analytics approaches in your research Higher Education in Austerity Europe Jon Nixon,2017-09-21 The financial crisis of 2007 2008 prompted governments across Europe to adopt austerity measures aimed at the reduction of their escalating budget deficits Higher Education in Austerity Europe explores how the resulting cuts in public expenditure together with the increasing reliance on the privatisation of services have impacted on higher education directly through the reduction of public sector provision and indirectly as a result of the social and political consequences of that reduction Moreover it explores how the effects of these economic policies have differed markedly across the national regions of Europe with the result that inequality has increased significantly both within and between national regions and this in turn has led to social and political dislocation within and across communities It is only by viewing higher education within this broader context that we can begin to understand the full implications of the austerity measures introduced over the last ten years Jon Nixon draws together leading scholars to delve into the complexity of impact and response generated by these measures Part 1 focuses on cross European perspectives Part 2 on the impact of austerity measures within national systems and Part 3 on new perspectives and possibilities The volume also includes considered responses from outsiders by academics located in Asia Australia and the USA providing an additional dimension to the analysis As well as analysing the

full impact of austerity measures across some of the worst hit national regions of Europe the contributors also identifying openings and possibilities for renewal
