On the Road of the Winds Patrick Vinton Kirch, 2017-11-07 The Pacific Ocean covers one third of the earth s surface and encompasses many thousands of islands that are home to numerous human societies and cultures Among these indigenous Oceanic cultures are the intrepid Polynesian double hulled canoe navigators the atoll dwellers of Micronesia the statue carvers of remote Easter Island and the famed traders of Melanesia Decades of archaeological excavations combined with allied research in historical linguistics biological anthropology and comparative ethnography have revealed much new information about the long term history of these societies and cultures On the Road of the Winds synthesizes the grand sweep of human history in the Pacific Islands beginning with the movement of early people out from Asia more than 40 000 years ago and tracing the development of myriad indigenous cultures up to the time of European contact in the sixteenth to eighteenth centuries This updated edition enhanced with many new illustrations and an extensive bibliography synthesizes the latest archaeological linguistic and biological discoveries that reveal the vastness of ancient history in the Pacific Islands

The Wet and the Dry Patrick Vinton Kirch, 1994 Scholars and researchers have long believed that the ability to irrigate is crucial to the development of civilizations In this book archaeologist Patrick Kirch challenges this hydraulic hypothesis and provides a more accurate and detailed account of the role of wet and dry cultivation systems in the development of complex sociopolitical structures Examining research on cultural adaptation and ecology in Western Polynesia and utilizing extensive data from a variety of important South Pacific sites Kirch not only reveals how particular systems of production developed within the constraints imposed by environmental conditions but also explores the tension that arises between contrasting productive systems with differential abilities to produce surplus He shows that the near total neglect of short fallow dryland cultivation as well as arboriculture or tree cropping has seriously distorted the picture that archaeologists and anthropologists have of agricultural intensification and its relation to complex social structure This work likely to become a classic will be central to all future

discussions of the ecology and politics of agricultural intensification
