

# 8 MOST COMMON FINGERPRINT PATTERNS

Three basic types and their subcategories

## Plain Arch

It starts on one side of the finger and the ridge then slightly cascades upward.

## Tented Arch

The tented arch lies in the ridges in the centre and is not continuous like the plain arch.

## Ulnar Loop

These loops are not very common and most of the times will be found on the index fingers.

## Radial Loop

The flow of this pattern runs from the thumb towards the little finger of the hand.

## Double Loop

It has two distinct and separate shoulders for each core, two deltas and one or more ridges that make a complete circuit.

## Plain Whorl

The ridges in these whorls make a turn of one complete circuit with two deltas and are therefore circular or spiral in shape.

## Central Pocket Loop Whorl

These whorl ridges make one complete circuit and may be oval, circular, spiral or any variant of a circle.

## Accidental Whorl

Whorls containing ridges that match the characteristics of a particular whorl sub-grouping are referred to as accidental whorls.
