Raman Spectroscopy Applied to Earth Sciences and Cultural Heritage J. Dubessy,M.-C. Caumon ,F. Rull,2012-11-20 Spectroscopic methods such as Raman are used to investigate the structure and dynamics of matter They are essential for the study of the different types of mineral or organic materials produced at the Earths surface or interior As a result of technological improvements in gratings detectors filters and personal computers in the last decade many micro Raman spectrometers have become plug and play instruments very easy to use and available at a lower cost than the early Raman microprobes Thus many laboratories in Earth Sciences and Cultural Heritage are equipped with these new spectrometers Commercial portable Raman spectrometers working in the field have also contributed to the spread of Raman spectroscopy Poor levels of education in terms of Raman spectroscopy in undergraduate courses in Earth Sciences make it difficult for individuals to obtain information of the highest quality relevant to Earth sciences and Cultural Heritage This volume is therefore timely Four main topics are addressed Theory Methodology including the instrumentation Experimental aspects and Application

X-Ray Lasers Raymond C. Elton,2012-12-02 The first in its field this book is both an introduction to x ray lasers and a how to guide for specialists It provides new entrants and others interested in the field with a comprehensive overview and describes useful examples of analysis and experiments as background and guidance for researchers undertaking new laser designs In one succinct volume X Ray Lasers collects the knowledge and experience

gained in two decades of x ray laser development and conveys the exciting challenges and possibilities still to come The reader is first introduced to the technical challenges unique to the design and operation of lasers in the vacuum region of the spectrum where the atmosphere is highly absorbent and optics are at best unconventional A discussion of the basic principles for and limitations in achieving significant x ray amplification as well as descriptions of gain measurement techniques and instrumentation follows Various approaches for pumping media to x ray gain conditions are also analyzed and descriptions of experimental progress are included wherever possible The book concludes with a description and comparison with alternate sources and applications for an x ray laser This work is both an introduction to x ray lasers and a how to guide for specialists It provides new entrants and others interested in the field with a comprehensive overview and describes useful analyses and experiments as guidance for researchers undertaking new laser designs Provides first comprehensive treatment of lasers for wavelengths shorter than the near ultraviolet 2000 Contains descriptions and comparisons with alternate sources Includes a section describing possible applications
