Richards,2014-02-05 David A J Richards s *Resisting Injustice and The Feminist Ethics of Care in The Age of Obama* Suddenly All The Truth Was Coming Out builds on his and Carol Gilligan s *The Deepening Darkness* to examine the roots of the resistance movements of the 1960s the political psychology behind contemporary conservatism and President Obama s present day appeal as well as the reasons for the reactionary politics against him Richards begins by laying out the basics of the ethics of care and proposing an alternative basis for ethics relationality which is based in convergent findings in infant research neuroscience and evolutionary psychology He critically analyzes patriarchal politics and states that they are rooted in a reactionary psychology that attacks human relationality and ethics From there the book examines the 1960s resistance movements and argues that they were fundamentally oriented around challenging patriarchy Richards asserts that the reactionary politics in America from the 1960s to the present are in service of an American patriarchy threatened by the resistance movements ranging from the 1960s civil rights movements to the present gay rights movement Reactionary

politics intend to marginalize and even reverse the ethical achievements accomplished by resistance movements creating in effect a system of patriarchy hiding in democracy Richards consequently argues that Obama's appeal is connected to his challenge to this system of patriarchy and will examine both Obama's appeal and the reactions against him in light of the 2012 presidential election This book positions recent American political development in a broad analysis of the role of patriarchy in human oppression throughout history and argues that a feminist based ethics of care is necessary to form a more humane and inclusive democratic politics      *Quick Writes Grades 6-8* Pamela Marx,1999-03 Educational resource for teachers parents and kids      The Well-Educated Mind Susan Wise Bauer,2015-11-05 The enduring and engaging guide to educating yourself in the classical tradition Have you lost the art of reading for pleasure Are there books you know you should read but haven't because they seem too daunting In *The Well Educated Mind* Susan Wise Bauer provides a welcome and encouraging antidote to the distractions of our age electronic and otherwise Newly expanded and updated to include standout works from the twenty first century as well as essential readings in science from the earliest works of Hippocrates to the discovery of the asteroid that killed the dinosaurs *The Well Educated Mind* offers brief entertaining histories of six literary genres fiction autobiography history drama poetry and science accompanied by detailed instructions on how to read each type The annotated lists at the end of each chapter ranging from Cervantes to Cormac McCarthy Herodotus to Laurel Thatcher Ulrich Aristotle to Stephen Hawking preview recommended reading and encourage readers to make vital connections between ancient traditions and contemporary writing *The Well Educated Mind* reassures those readers who worry that they read too slowly or with below average comprehension If you can understand a daily newspaper there's no reason you can't read and enjoy Shakespeare's sonnets or *Jane Eyre* But no one should attempt to read the Great Books without a guide and a plan Bauer will show you how to allocate time to reading on a regular basis how to master difficult arguments how to make personal and literary judgments about what you read how to appreciate the resonant links among texts within a genre what does *Anna Karenina* owe to *Madame Bovary* and also between genres In her best selling work on home education *The Well Trained Mind* the author provided a road map of classical education for parents wishing to home school their children that book is now the premier resource for home schoolers In *The Well Educated Mind* Bauer takes the same elements and techniques and adapts them to the use of adult readers who want both enjoyment and self improvement from the time they spend reading Followed carefully her advice will restore and expand the pleasure of the written word

**The Book Review Digest** ,2005      **The Way of the World** David Fromkin, 2013-01-09 How did we get here David Fromkin provides arresting and dramatic answers to the questions we ask ourselves as we approach the new millennium He maps and illuminates the paths by which humanity came to its current state giving coherence and meaning to the main turning points along the way by relating them to a vision of things to come His unconventional approach to narrating universal history is to focus on the relevant past and to single out the eight critical evolutions that brought the world from the Big Bang to the eve of the twenty first century He describes how human beings survived by adapting to a world they had not yet begun to make their own and how they created and developed organized society religion and warfare

He emphasizes the transformative forces of art and the written word and the explosive effects of scientific discoveries. He traces the course of commerce, exploration, the growth of law and the quest for freedom and details how their convergence led to the world of today. History's great movements and moments are here: the rise of the first empires in Mesopotamia, the exodus from Pharaoh's Egypt, the coming of Moses, Confucius, the Buddha, Jesus, and Muhammad, the fall of the Roman Empire, the rise of China, Vasco da Gama finding the sea road to India that led to unification of the globe under European leadership. Connections are made: the invention of writing, of the alphabet, of the printing press, and of the computer lead to an information revolution that is shaping the world of tomorrow. The industrial, scientific, and technological revolutions are related to the credit revolution that lies behind today's world economy. The eighty-year world war of the twentieth century, which ended only on August 31, 1994, when the last Russian troops left German soil, points the way to a long but perhaps troubled peace in the twenty-first. Where are we now? The Way of the World asserts that the human race has been borne on the waters of a great river, a river of scientific and technological innovation that has been flowing in the Western world for a thousand years and that now surges forward more strongly than ever. This river highway, it says, has become the way of the world, and because the constitutional and open society that the United States champions is uniquely suited to it, America will be the lucky country of the centuries to come. Fromkin concludes by examining some of the choices that lie ahead for a world still constrained by its past and by human nature but endowed by science with new powers and possibilities. He pictures exciting prospects ahead if the United States takes the lead and can develop wisdom on a scale to match its good fortune.

**Re-Envisioning Christian Humanism** Jens Zimmermann, 2016-11-24. Since the early 1980s there has been renewed scholarly interest in the concept of Christian Humanism. A number of official Catholic documents have stressed the importance of Christian humanism as a vehicle of Christian social teaching and indeed as a Christian philosophy of culture. Fundamentally, humanism aims to explore what it means to be human and what the grounds are for human flourishing. Featuring contributions from internationally renowned Christian authors from a variety of disciplines in the humanities, *Re-Envisioning Christian Humanism* recovers a Christian humanist ethos for our time. The volume offers a chronological overview from patristic humanism to the Reformation and beyond and individual examples: Jewell Calvin of past Christian humanisms. The chapters are connected through the theme of Christian *paideia* as the foundation for liberal arts education.
