Gilles Deleuze's Philosophy Of Time A Critical:

Gilles Deleuze's Philosophy of Time James Williams, 2011-02-23 This book provides an overall interpretation of Deleuze's philosophy alongside a critical introduction to one of the most important unifying ideas in his work the construction of new and important philosophies of time *The Cambridge Companion to Deleuze* Daniel W. Smith, Henry Somers-Hall, 2012-09-27 This book provides a clear comprehensive survey of Deleuze's philosophy whilst also offering deep analysis of key aspects of his thought *Queer and Deleuzian Temporalities* Rachel Loewen Walker, 2021-11-18 Rachel Loewen Walker's original study of Deleuze's theory of temporality advances a concept of the living present as a critical juncture through which novel meanings and activations take flight in relation to new feminist materialisms queer theory Indigenous studies and studies of climate Drawing on literature philosophy popular culture and community research Loewen Walker unsettles the fierce linearity of our stories particularly as they uphold fixed systems of gender sexuality and identity Treading new ground for Deleuzian studies this book focuses on the non linearity of the living present to show that everything is within rather than outside of time Through this critical re evaluation which takes in climate change queer and trans politics and Indigenous sovereignty *Queer and Deleuzian Temporalities* thickens the present moment By opening up multiple pasts and multiple futures we are invited to act with a deepened level of accountability to all possible timelines

Deleuze and Futurism Helen Palmer, 2014-08-28 This book is an original exploration of Deleuze's dynamic philosophies of space time and language bringing Deleuze and futurism together for the first time Helen Palmer investigates both the potential for creative novelty and the pitfalls of formalism within both futurist and Deleuzian linguistic practices Through creative and rigorous analyses of Russian and Italian futurist manifestos the futurist aspects of Deleuze's language and thought are drawn out The genre of the futurist manifesto is a literary and linguistic model which can be applied to Deleuze's work not only at times when he writes explicitly in the style of a manifesto but also in his earlier writings such as *Difference and Repetition* 1968 and *The Logic of Sense* 1969 The way in which avant garde manifestos often attempt to perform and demand their aims simultaneously and the problems which arise due to this is an operation which can be perceived in Deleuze's writing With a particular focus on Russian zaum the book negotiates the philosophy behind futurist nonsense language and how Deleuze propounds analogous goals in *The Logic of Sense* This book critically engages with Deleuze's poetics ultimately suggesting that multiple linguistic models operate synecdochically within his philosophy

E-Co-Affectivity Marjolein Oele, 2020-04-01 Offers an interdisciplinary investigation of affectivity in various forms of life *E Co Affectivity* is a philosophical investigation of affectivity in various forms of life photosynthesis and growth in plants touch and trauma in bird feathers the ontogenesis of human life through the placenta the bare interface of human skin and the porous materiality of soil Combining biology phenomenology Ancient Greek thought new materialisms environmental philosophy and affect studies Marjolein Oele thinks through the concrete living places that show the receptive responsive

power of living beings to be affected and to affect She focuses on these localized interfaces to explain how affectivity emerges in places that are always evolving creative porous and fluid Every interface is material but is also more than its current materiality in cocreating place time and being After extensively describing the effects of the milieu and community within which each example of affectivity takes place in the final chapter Oele adds a prescriptive ethical lens that formulates a new epoch beyond the Anthropocene one that is sensitive to the larger ecological communal concerns at stake This is a very welcome contribution to environmental philosophy The strikingly original thesis is evident in the book's title what we call ecology is a co-affectivity the mutuality of affecting and being affected on the part of species biological kingdoms ecosystems etc Here Marjolein Oele melds biology and ontology in new and creative ways enriching both fields Her book performs the very theme it explores it stages a co-affective relation between philosophy and the life sciences Michael Marder author of *Plant Thinking A Philosophy of Vegetal Life*

Deleuze and Pragmatism Simone Bignall, Sean Bowden, Paul Patton, 2014-09-19 This collection brings together the philosophy of Gilles Deleuze and the rich tradition of American pragmatist thought taking seriously the commitment to pluralism at the heart of both Contributors explore in novel ways Deleuze's explicit references to pragmatism and examine the philosophical significance of a number of points at which Deleuze's philosophy converges with or diverges from the work of leading pragmatists The papers of the first part of the volume take as their focus Deleuze's philosophical relationship to classical pragmatism and the work of Peirce James and Dewey Particular areas of focus include theories of signs metaphysics perspectivism experience the transcendental and democracy The papers comprising the second half of the volume are concerned with developing critical encounters between Deleuze's work and the work of contemporary pragmatists such as Rorty Brandom Price Shusterman and others Issues addressed include antirepresentationalism constructivism politics objectivity naturalism affect human finitude and the nature and value of philosophy itself With contributions by internationally recognized specialists in both poststructuralist and pragmatist thought the collection is certain to enrich Deleuze scholarship enliven discussion in pragmatist circles and contribute in significant ways to contemporary philosophical debate

Constructing Identity in and around Organizations Majken Schultz, Steve Maguire, Ann Langley, Haridimos Tsoukas, 2012-01-19 *Constructing Identity in and around Organizations* is the second volume in *Perspectives on Process Organization Studies* a series which explores an emerging approach to the study of organizations that focuses on understanding activities interactions and change as essential properties of organizations rather than structures and state an approach which prioritizes activity over product change over persistence novelty over continuity and expression over determination The constructing of identities those processes through

which actors in and around organizations claim accept negotiate affirm stabilize maintain reproduce challenge disrupt destabilize repair or otherwise relate to their sense of selves and others has become a critically important topic in the study of organizations This volume attempts to amplify and possibly refract contemporary debates amongst identity scholars that question established notions of identity as essence entity or thing It calls for alternative approaches to understanding identity and its significance in contexts in and around organizations by conceptualizing it as process that is being continually under construction Based in diverse theoretical and philosophical traditions and contexts contributions by leading scholars to this volume offer new perspectives on how individual and organizational identities evolve and come to be constructed through ongoing activities and interactions

The Politics of Orientation Hannah Richter, 2023-10-01 The Politics of Orientation provides the first substantial exploration of a surprising theoretical kinship and its rich political implications between Gilles Deleuze's philosophy and the sociological systems theory of Niklas Luhmann Through their shared theories of sense Hannah Richter draws out how the works of Luhmann and Deleuze complement each other in creating worlds where chaos is the norm and order the unlikely and yet remarkably stable exception From the encounter between Deleuze and Luhmann Richter develops a novel take on postfoundational ontology where subjects and societies unfold in self-productive relations of sense against a background of complexity The Politics of Orientation breaks and rebuilds theoretical alliances by reading core concepts and thinkers of Continental Philosophy from Leibniz to Whitehead and Marx through this encounter Most importantly the book puts Luhmann and Deleuze to work to offer urgently needed insight into the rise of post-truth populism In our complex democratic societies Richter argues orientation against complexity has become the ground of political power privileging the simplistic narratives of the populist right

Deleuze and Architecture Helene Frichot, 2013-05-20 Critiques the legacy and ongoing influence of Deleuze on the discipline and practice of architecture This collection looks critically at how Deleuze challenges architecture as a discipline how architecture contributes to philosophy and how we can come to understand the complex politics of space of our increasingly networked world Since the 1980s Deleuze's philosophy has fuelled a generation of architectural thinking and can be seen in the design of a global range of contemporary built environments His work has also alerted architecture to crucial ecological political and social problems that the discipline needs to reconcile

Difference and Repetition James Williams,2013-01-31 A new edition of this introduction to Deleuze s seminal work Difference and Repetition with new material on intensity science and action and new engagements with Bryant Sauvagnargues Smith Somers Hall and de Beistegui *Deleuze, Mathematics, Metaphysics* Michael J.Ardoline,2024-09-30 Deleuze Mathematics Metaphysics provides new solutions to the central problems of the philosophy of mathematics by reconstructing Deleuze s

metaphysics It does so through direct engagement with analytic and continental philosophy along with the formal and natural sciences These new Deleuzian solutions reject equally other worldly accounts of mathematics such as Platonism and accounts which treat mathematics as a useful fiction or an empty formalist game Instead Deleuze Mathematics Metaphysics argues that mathematical truth is grounded in the necessity of difference itself Since difference is entirely this worldly the truth of mathematics does not require us to posit the reality of transcendent entities or possible worlds Doing so not only provides a new metaphysics of mathematics it also explains the usefulness of mathematics for science and why mathematical truth appear to have such otherworldly properties in the first place
