Guidebook On Reclaiming Sarawak Ncr Lands In Courts:

Gender and Land Tenure in the Context of Disaster in Asia Kyoko Kusakabe, Rajendra Shrestha, Veena N., 2015-06-30 This book explores an interdisciplinary field at the intersection of gender and development studies disaster and land tenure policy It is well known that women generally have weaker claims to land But how does that translate to increased vulnerability during disaster Using case studies from Asia this book argues that land tenure is a key factor in mitigating the impact of disasters on women The scale and frequency of disasters have been increasing in recent decades due to human impact on the landscape and climate Unsustainable farming and land management systems have increased environmental risks and social vulnerabilities However around the world the costs of disasters are disproportionately borne by women due largely to their reduced mobility and lack of control over assets In post disaster settings women s vulnerabilities increase due to gendered rescue and rehabilitation practices As such a gendered approach to land rights is critical to disaster preparedness and recovery
