and 3 will continue the story up to Rawls's Theory of Justice. The present volume begins with Socrates, the Cyrenaics and Cynics and Plato and then offers a fuller account of Aristotle stressing the systematic naturalism of his position. The Stoic position is compared with the Aristotelian at some length. Epicureans and Sceptics are discussed more briefly. Chapters on early Christianity and on Augustine introduce a fuller examination of Aquinas' revision, elaboration and defence of Aristotelian naturalism. The volume closes with an account of some criticisms of the Aristotelian outlook by Scotus Ockham, Machiavelli and some sixteenth century Reformers. The emphasis of the book is not purely descriptive narrative or exegetical but also philosophical. Irwin discusses the comparative merits of different views, the difficulties that they raise and how some of the difficulties might be resolved. The book tries to present the leading moral philosophers of the past as participants in a rational discussion that is still being carried on and tries to help the reader to participate in this discussion. **The Economist**, 1856

Precision-guided Munitions and Human Suffering in

War James E. Hickey, 2016-04-08 James Hickey proceeds from the premise that throughout history humans have demonstrated a proclivity for using violence against one another as a means to achieve an end means enabled in many respects by the technologies available at the time. Advancing technology has often been a prime enabler of ever increasing levels of violence and attendant human suffering. At a few junctures in history however certain technologies have seemingly provided the armed forces that possess them the ability to fight wars with decreasing levels of violence and suffering. Today precision guided munitions (PGMs) with their high degree of discrimination and accuracy again hold such promise. This book seeks to answer the question: Do PGMs mitigate suffering in war and have these weapons changed the way decisions regarding war and peace have been made? Answering this question helps us understand possible shifts in emphasis in modern warfare both in terms of methods employed and of the greater concern placed on limiting human suffering during conflict. This book will help students of ethics, just war and military history and senior military and civilian leaders to understand the possible outcomes and wider implications of their strategic choices to use such technology. **Nelson English - Book 4**
