Part I opens the book with an overview of the historical background and development of language based ethnographic research and Bourdieu's work in this space. Part II presents a series of case studies that highlight a Bourdieusian perspective and demonstrate how reflexivity impacts language based ethnography. In each study Bourdieu's conceptual framework of reflexively informed objectivity examines the ways in which the studies themselves were constructed and understood. Building on Parts I and II the concluding set of chapters in Part III unpacks the messiness of the theory and practice of language based ethnography and provides insights into what reflexivity means for Bourdieu and in practical contexts.
