PREAMBLE

The American Physical Therapy Association (APTA) is committed to meeting the physical therapy needs of society, to meeting the needs and interests of its members, and to developing and improving the art and science of physical therapy, including practice, education and research. To help meet these responsibilities, APTA's Board of Directors has approved the following guidelines for physical therapy documentation. It is recognized that these guidelines do not reflect all of the unique documentation requirements associated with the many specialty areas within the physical therapy profession. Applicable for both hand written and electronic documentation systems, these guidelines are intended to be used as a foundation for the development of more specific documentation guidelines in clinical areas, while at the same time providing guidance for the physical therapy profession across all practice settings. Documentation may also need to address additional regulatory or payer requirements.

Finally, be aware that these guidelines are intended to address documentation of patient/client management, not to describe the provision of physical therapy services. Other APTA documents, including APTA Standards of Practice for Physical Therapy, Code of Ethics and Guide for Professional Conduct, and the Guide to Physical Therapist Practice, address provision of physical therapy services and patient/client management.

APTA POSITION ON DOCUMENTATION

Documentation Authority For Physical Therapy Services

Physical therapy examination, evaluation, diagnosis, prognosis, and plan of care (including interventions) shall be documented, dated, and authenticated by the physical therapist who performs the service. Interventions provided by the physical therapist or selected interventions provided by the physical therapist assistant under the direction and supervision of the physical therapist are documented, dated, and authenticated by the physical therapist or, when permissible by law, the physical therapist assistant.

Other notations or flow charts are considered a component of the documented record but do not meet the requirements of documentation in or of themselves.

Students in physical therapist or physical therapist assistant programs may document when the record is additionally authenticated by the physical therapist or, when permissible by law, documentation by physical therapist assistant students may be authenticated by a physical therapist assistant.

Documentation for Rehabilitation Lori Quinn, James Gordon, 2015-12-11. Better patient management starts with better documentation. Documentation for Rehabilitation: A Guide to Clinical Decision Making in Physical Therapy, 3rd Edition shows how to accurately document treatment progress and patient outcomes. Designed for use by rehabilitation professionals, documentation guidelines are easily adaptable to different practice settings and patient populations. Realistic examples and practice exercises reinforce concepts and encourage you to apply what you've learned. Written by expert physical therapy educators Lori Quinn and James Gordon, this book will improve your skills in both documentation and clinical reasoning. A practical framework shows how to organize and structure PT records, making it easier to document functional outcomes in many practice settings and is based on the International Classification of Functioning Disability and Health ICF model, the one adopted by the APTA. Coverage of practice settings includes documentation examples in acute care, rehabilitation, outpatient, home care, and nursing homes, as well as a separate chapter on documentation in pediatric settings. Guidelines to systematic documentation describe how to identify, record, measure, and evaluate treatment and therapies, especially important when insurance companies require evidence of functional progress in order to provide reimbursement. Workbook/textbook format uses examples and exercises in each chapter to reinforce your understanding of concepts. NEW Standardized Outcome Measures chapter leads to better care and patient management by helping you select the right outcome measures for use in evaluations, re-evaluations, and discharge summaries. UPDATED content is based on data from current research, federal policies, and APTA guidelines, including incorporation of new terminology from the Guide to Physical Therapist 3.0 and ICD-10 coding. EXPANDED number of case examples covers an even broader range of clinical practice areas.
