Revisiting Bilateral Investment Treaties in the 21st Century. A Kenyan and South African Experience Sharon Mutsaers, 2017-09 Bilateral investment treaties BITs signed prior to the 21st century are problematic Some countries with BITs signed during this period have since reviewed those BITs and taken action to address the disadvantages the BITs held for the host nation or have either resorted to eradicating some of their BITs In particular developing countries that signed BITs with developed nations seem to be disproportionately disadvantaged in these agreements This research highlights Kenya's current BIT situation and compares it in light of another developing country South Africa with regards to its BIT experience Given that South Africa has undergone an extensive BIT review process and moves to change some of these BITs this study compares and contrasts the Kenyan and South African experience The study highlights the possible lessons that could be learnt from the South African BIT review experience and provides recommendations for the Kenyan government regarding its outdated BITs The lessons and recommendations benefit not only Kenya but also other countries that are still to review their BITs as it adds to the literature on why it is important for countries with such BITs to revisit them and how they can go about the review mechanism best In addition the study is also significant as far as it raises awareness of the use and effects of BITs thereby enabling countries that enter into such agreements to make informed decisions

Foreign Direct Investment and International Law Adaeze Agatha Aniodoh,2025-07-16

This book examines the regulatory framework for foreign direct investments most notably the bilateral investment treaties which provide several guarantees that minimise the exposure of risks to foreign investors in a host State. Most States have recognised that one of the ways they can improve their economic growth is by providing effective mechanisms for the attraction of foreign investments. In this regard, foreign direct investments have become a key element in the strategic vision for advancing any national economy. The book examines guarantees which have the capacity to impinge on the economic sovereignty of a State, raising questions such as: are host States obliged to comply with the rights of foreign investors to free capital repatriation in the face of economic difficulties? What power does a host State have to regulate and impose capital controls that are deleterious to the rights of a foreign investor? This book argues that policies aimed at increasing foreign direct investment need to extend beyond investment liberalisation to strike a balance between the regulatory rights of a State and the legitimate expectations of foreign investors. Advancing the discussion on the necessity of balancing the needs of foreign investors with those of the host community and exploring the power asymmetry present in treaty negotiations, this book will be of interest to students, academics and practitioners with an interest in international investment law.
