

PurAthletics[®] CHEST EXPANDER

The PurAthletics Chest Expander is made up of a pair of strong PVC handles joined by a number of rubber tubes (vs. metal spring). The rubber tubes can be detached to adjust tension according to need, ranging from low to high resistance. The exercise consisting in stretching the rubber tubes by pulling the handles away from each other with the aim to strengthen muscles is called strandpulling or cable training. Though strengthening the chest muscles is the most common exercise of strandpulling, the PurAthletics Chest Expander is very versatile and can be used to target different muscles of the body, such as the legs and the back.

HOW TO ADJUST THE CHEST EXPANDER TENSION

1. Hold on one end of the Chest Expander handle.
2. Push the coupling upward until the cover releases. Remove the cover.
3. Insert the coupling on the hole and rotate until it rests onto lock position. Ensure the coupling is engaged properly on the side lock otherwise there's a possibility that the rubber tubing will snap.
4. Once the coupling is locked on position, insert the cover thoroughly by pushing down until the cover locks on the slit.

Just like any other exercise product, begin with the minimal tension then slowly transition to heavier tension as you progress.

Front Chest Pull

The Front Chest Pull consists in using the PurAthletics Chest Expander to increase the size of your pectoral muscles, or "pecs". Hold the chest expander out in front of you with one hand holding each end, arms placed at 9 and 3 o'clock respectively on an imaginary clock. Bend your elbows so your arms are close to your ribs. Pull the rubber tubes straight back to shoulder plane height, extending slightly further back for increased range. Then bring arms back to the front, bending elbows again. You have completed one rep. When aiming at increasing your muscle size, the American College of Sports Medicine (ACSM) recommends doing 1-3 sets of 8-12 reps for novice to intermediate and 2-6 sets of 1-8 reps for advanced. To complete isometric exercises, hold the outward position for 2 to 30 seconds.

Back Press

The Back Press consists in using the PurAthletics Chest Expander to increase the size of your back muscles. Hold the chest expander behind your back with palms out and arms at your sides. Open your arms outwards at your sides to train back muscles. For the lat muscles of your middle back, place arms in a W shape. Then reach out until your arms are completely outstretched at shoulder height. Make sure the cables do not press uncomfortably against your skin. Complete the same amount of reps as for the Front Chest Pull.
