

# MEASURING CHANGE SUCCESS

Consider the three dimensions of completion, achievement and acceptability, derived from the research of Susan Miller, when evaluating the success of your implementation efforts.

## DIMENSION

## SAMPLE METRICS

### ACHIEVEMENT

#### Did you achieve what you intended?

How well does what you implemented perform? Did you achieve your intended outcomes?

+  -

- Learning: % staff trained /coached
- Adoption: % staff using new product, program etc.
- Performance: % reduction in errors; % increase customer satisfaction
- Vision: Growth yr-on yr; Cost savings

### COMPLETION

#### Did you complete the implementation?

Did you complete all the intended aspects of the implementation, within the anticipated timeframe?

+  -

- Schedule, scope, budget planned/actual
- Completion of planned change supports
- Effectiveness of change supports (e.g., communication, training, etc.)

### ACCEPTABILITY

#### Are your stakeholders satisfied?

How satisfied are stakeholders with the implementation process and outcomes?

+  -

- Agreement with the need for change
- Satisfaction with the change product
- Satisfaction with the change process
- Trust in leadership
- Perceptions of org change competency

Health Professionals offers an authoritative guide for allied health professionals and students. The authors, noted experts on the topic, explore the assessment process that encompasses the data collection methods, the evaluation process that determines the effectiveness of an intervention, and standardised and systematic outcome measurement procedures. The book discusses in detail the various methods of data collection: observation, interview, standardised testing, and the types of sources: self-report, proxy, observational, for collecting information. The main purposes of assessment: descriptive, evaluative, predictive, discriminative, are also presented. The book addresses the topics of standardization, levels of measurement, reliability, validity, and clinical usefulness. The text provides the information needed to select and perform assessment and outcomes measurement to inform goal setting, evaluate outcomes, and ensure that interventions are effective, efficient, and economical in order to provide quality services to clients and their carers. This important book covers information on assessment and measurement in practice, research, and service evaluation and improvement. Explores how to develop and evaluate assessments and outcome measures. Offers an international perspective. Discusses the criteria for choosing a particular assessment approach. Informs the critical appraisal of the evidence underpinning standardised assessments and measures and selecting the best tools for practice or research. Includes updated and additional case studies.
