Measuring Up Arie L. Nettles, Michael T. Nettles, 2012-12-06 *Measuring Up* revisits vital issues of equity and assessment through the research efforts and insights of many of the nation's most prominent educators and assessment experts. As its most urgent purpose, the publication aims to sensitize readers to the unfairness and inappropriate uses of testing instruments which under optimal circumstances have the potential to benefit all students. With America fervently espousing both national and state testing, the differential performance by race and social class raises the specter of tests as barriers to life milestones such as promotion, graduation, and college admissions. In response to such punitive testing, the papers included here explore a host of models and practices that are currently being piloted both in America and abroad as educators grapple with the effects the assessment is having on minority and disadvantaged students and school systems. In the process, outcomes of innovative portfolio and authentic assessments are weighed against important standards and principles of validity and consequences. As the various authors probe the gap between African American and White test scores, they raise important questions of resources, family background, and educational opportunity. Beyond their value of their recommendations to educators, their papers help to identify causes of pupil deficiencies in ways that can be addressed by policymakers. To reinforce the emphasis on equity, several authors present a definitive defense of affirmative action as a critical countermeasure to the lack of fairness in school quality, family and social supports, and educational resources. Measuring Up Daniel Koretz, 2009-09-15 *Measuring Up* demystifies educational testing from MCAS to SAT to WAIS. Bringing statistical terms down to earth, Koretz takes readers through the most fundamental issues that arise in educational testing and shows how they apply to some of the most controversial issues in education today, from high stakes testing to special education.

Measuring Up in Higher Education Anthony Welch, Jun Li, 2021-05-03 This book examines the quality assessment movement in academic scholarship as globalization prompts a search for global measures of university services and output. It gauges productivity in terms of universal publication metrics and considers ranking and research productivity from a comparative perspective. The book considers the use of the impact factor as a gauge of publication value, noting that this is less important in countries lacking central government appropriations to universities and to research. It argues that pressure to publish in certain journals and to research topics of interest to English language readers has been felt differentially in English language systems compared to others, but also that performance pressures fall more on younger, more junior contract staff than on senior and tenured professors. It problematizes international comparisons of quality and analyses the benefits of a zone of ideas and metrics in a common language promoting international mobility, efficiency, collaboration, but also the costs which are rarely borne equally across countries, languages, and cultures. The book provides a strong evidence-based contribution to major debates in contemporary higher education reforms and the measurement of academic output.
