When Care is Conditional Dani Carrillo,2024-01-08 From its inception the public safety net in the United States has excluded many people because of their race gendered roles or other factors As a result they must prove their moral worthiness to get resources for themselves and their families In *When Care Is Conditional* sociologist Dani Carrillo reveals the ramifications of this conditional safety net by focusing on one particularly vulnerable population undocumented immigrants Through in depth interviews with Latinx immigrants in northern California Carrillo examines three circumstances place gender and immigration status that intersect to influence an individual s access to health care food assistance and other benefits She demonstrates that place of residence affects undocumented immigrants ability to get care since more services are available in urban areas where many immigrants cannot afford to live than suburban areas where public transportation is limited She also shows that while both men and women who are undocumented have difficulty obtaining care men often confront more challenges Undocumented women who are pregnant or mothers are eligible for some government safety net programs and rely on informal coethnic networks or a guiding figure a relative friend neighbor or coworker who explains how to get care and makes them feel confident in accessing it Most undocumented men in contrast are not eligible for public programs except in a medical emergency and often lack someone to guide them directly to care Men sometimes steer one another to jobs through worker centers where they may learn about various services and take advantage of those that increase their employability like English or computer classes but a culture of masculinity leads them to downplay medical problems and seek health care only in a crisis As undocumented immigrants navigate this exclusionary system Carrillo finds that they resist the rhetoric stigmatizing them as lawbreakers Dismissing the importance of papers and highlighting their work ethic they question the fairness of U S immigration policies and challenge ideas about who deserves care Carrillo offers concrete recommendations such as improving labor conditions and reexamining benefit eligibility to increase access to care for not only undocumented immigrants but also people who have been excluded because of their race criminal record gender identity sexual orientation or disability She argues that working with and across populations creates a powerful form of solidarity in advocating for inclusive care *When Care Is Conditional* provides compelling insights into how safety net and immigration policies intersect to affect people s everyday lives and calls for a cultural shift so that the United States can provide unconditional care for all

Estimating Eligibility and Participation for the WIC Program National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel to Evaluate the USDA's Methodology for Estimating Eligibility and Participation for the WIC Program,2001-08-14 Each year the U S Department of Agriculture USDA must estimate the number of people who are eligible to participate in the Special Supplemental Nutrition Program for

Women Infants and Children WIC These USDA estimates have come under critical scrutiny in part because the number of infants and postpartum women who have actually enrolled in the program has exceeded the number estimated to be eligible by as much as 20 to 30 percent These high coverage rates have led some members of Congress to conclude that some people who participate are truly ineligible and that funding could be reduced somewhat and still meet the needs of truly eligible persons who wish to participate But some advocates and state WIC agencies believe that the estimates of the number of eligible persons are too low and more people who are eligible and want to participate could do so In response to these concerns the Food and Nutrition Service FNS of the USDA asked the Committee on National Statistics of the National Research Council to convene a panel of experts to review the methods used to estimate the number of people nationwide who are eligible and likely to participate in the WIC program The panel s charge is to review currently used and alternative data and methods for estimating income eligibility adjunctive eligibility from participation in other public assistance programs nutritional risk and participation if the program is fully funded *Medicare and the American Health Care System* ,1993

policy unravels the multifaceted and perplexing puzzle of Medicaid with respect to those who invest in and benefit from the program Assessing the social political and economic dynamics that have shaped Medicaid for almost half a century she helps readers of all backgrounds understand the entrenched and powerful interests woven into the system that have been instrumental in swelling costs and holding elected officials hostage Addressing such fundamental questions as whether patients receive good care and whether Medicaid meets the needs of the low income population it is supposed to serve Olson evaluates the extent to which the program is an appropriate foundation for health care reform *Blue Cross and Medical Service Plans* Louis S.
