MEDICAL TERMINOLOGY

THE BASICS

FOUNDATION OF MEDICAL WORDS

A. Structure

Most medical words are composed of two or more terms. To define a medical word:

- divide the word into its terms
- analyze the terms
- define the word

Examples:

Pericarditis

peri = around; *card* = heart; *itis* = inflammation

Inflammation around the heart

Oncology

onco = tumor, mass; *logy* = study of

Study of tumors

B. Terms

Term + Term (____ + ____) = medical word

There are five categories of terms:

1. **Prefix** - beginning of a word

(*ex*, *pre*, *post*)

Designated by a "____" after the term.

2. **Suffix** - ending of a word

(*ex*, *stomy*; *itis*)

Designated by a "____" before the term.

3. **Root** - foundation/base of a word

(*ex*, *gastr*, *gastro*)

4. **Combining vowel** - vowel (usually "o")

added to a root (*ex*, *gastro*).

Use a combining vowel when joining:

a. Root to another root (*ex*, *gastrogastritis*)

b. Root to a suffix beginning with a consonant (*ex*, *cardiomyopathy*)

5. **Combining form** - root + vowel

(*ex*, *gastric*, *gastro*)

Designated by a "____" between the root and the vowel

Examples:

Hypertrochocytosis

hyper (prefix) = excessive

troch (combining form) = white

cyt (root) = cell

osis (suffix) = condition of

Definition: condition of excessive white blood cells (leukocytes)

Hematotoxic

hema (combining form) = blood

tox (root) = poison

ic (suffix) = pertaining to

Definition: pertaining to blood poisoning

TIPS:

1. Some terms have more than one definition.

To determine the correct definition in a particular medical word, analyze the other terms in the word.

Example: **Poliomyelitis**

polio = gray (matter)

myel = spinal cord, bone marrow

itis = inflammation

Definition: Inflammation of the gray matter of the spinal cord. The bone marrow does not have gray matter.

2. Some terms may function as a root/

combining form in one word and a suffix in another word. Classification depends upon the specific medical word.

Examples: **Cytology**

cyt (combining form) = cell

logy (suffix) = study of

Definition: Study of cells

Erythrocyte

erythr (combining form) = red

cyte (suffix) = cell

Definition: Red blood cell

THE HUMAN BODY

A. Development

Cells - tissues - organs - systems - organisms

1. **Cells** - Major Components

a. Cell membrane

b. Cytoplasm

c. Nucleus

2. **Tissues** - Primary Types

a. Connective

b. Epithelium

c. Muscle

d. Nervous

3. **Organs**

a. Composed of two or more different tissues

b. Have specific functions

4. **Systems** - Related organs with common functions

5. **Organism**: A living person

B. Cavities

A space containing organs

1. **Dorsal**

a. Cranial

b. Vertebral (spinal)

2. **Ventral**

a. Abdominal

b. Pelvic

c. Thoracic

C. Planes

An imaginary flat surface

1. **Frontal** - anterior/posterior

2. **Sagittal** - right/left

3. **Transverse** - upper/lower

D. Positions

A reference point for location or direction.

1. **Anterior/Ventral** - front of the body

Posterior/Dorsal - back of the body

2. **Deep** - away from the surface

Superficial - on the surface

3. **Inferior** - situated below

Superior - situated above

4. **Lateral** - pertaining to the side

5. **Medial** - pertaining to the middle

6. **Prone** - lying face down

Supine - lying face up

Health Informatics: Practical Guide for Healthcare and Information Technology Professionals (Sixth Edition)

Robert E. Hoyt, Ann K. Yoshihashi, 2014 Health Informatics HI focuses on the application of Information Technology IT to the field of medicine to improve individual and population healthcare delivery education and research This extensively updated fifth edition reflects the current knowledge in Health Informatics and provides learning objectives key points case studies and references

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1974 First multi year cumulation covers six years 1965 70 *Introduction to Reference Sources in the Health Sciences, Sixth Edition* Jeffrey T. Huber, Susan Swogger, 2014-04-22 Prepared in collaboration with the Medical Library Association this completely updated revised and expanded edition lists classic and up to the minute print and electronic resources in the health sciences helping librarians find the answers that library users seek Included are electronic versions of traditionally print reference sources trustworthy electronic only resources and resources that library users can access from home or on the go through freely available websites or via library licenses In this benchmark guide the authors Include new chapters on health information seeking point of care sources and global health sources Focus on works that can be considered foundational or essential in both print and electronic formats Address questions librarians need to consider in developing and maintaining their reference collections When it comes to questions involving the health sciences this valuable resource will point both library staff and the users they serve in the right direction

Computer Medical Databases Morris F. Collen, 2011-10-20 Chapter 1 offers an overview of the basic computer technology Each succeeding chapter describes the problems in medicine followed by a review in chronological sequence of why and how computers were applied to try to meet these problems Only the technical aspects of computer hardware software and communications are discussed as they are necessary to explain how the technology was applied This approach generally led to defining the objectives for applications of medical informatics At the end of each chapter the author summarizes his personal views and interpretations of the chapter contents Although the concurrent evolution of medical informatics in Canada Europe and Japan certainly influenced workers in the United States the scope of this historical review is limited to the development of medical informatics within the United States Furthermore this review is limited to electronic digital computers it excludes mechanical analog and hybrid computers

Terminology, Ontology and their Implementations Peter L. Elkin, 2023-07-19 This revised new edition containing numerous new and heavily updated chapters provides readers with the essential information needed to understand the central topics of terminology in healthcare the understanding of which is an asset to be leveraged in care and research Twenty five years ago the notion that terminology should be concept based was all but unknown in healthcare now almost all important terminologies are at least partly concept based With no general model of what a terminology was or should be there were no tools to support terminology development and maintenance Steady progress since then has improved both terminology content and the

technology and processes used to sustain that content This new edition uses real world examples from the health sector to delineate the principal issues and solutions for the field of data representation It includes a history of terminologies and in particular their use in healthcare including inter enterprise clinical and research data aggregation Terminology Ontology and their Implementations covers the basis authoring and use of ontologies and reference terminologies including the formalisms needed to use them safely The editor and his team of carefully chosen contributors exhaustively reviews the field of concept based indexing and provides readers with an understanding of natural language processing and its application to health terminologies The book discusses terminology services and the architecture for terminological servers and consequently serves as the basis for study for all students of health informatics *Health Informatics Sixth Edition Supplement: Practical Guide for Healthcare and Information Technology Professionals* Ann K. Yoshihashi, Robert E. Hoyt, 2016-11-15 Health Informatics Practical Guide for Health and Information Technology Professionals Sixth Edition Supplement adds 3 new chapters The supplement has learning objectives case studies recommended reading future trends key points and references Introduction to Data Science provides a comprehensive overview with topics including databases machine learning big data and predictive analytics Clinical Decision Support CDS covers current and salient aspects of CDS functionality implementation benefits challenges and lessons learned International Health Informatics highlights the informatics initiatives of developed and developing countries on each continent Available as a paperback and eBook For more information about the textbook visit www.informaticseducation.org For instructors an Instructor Manual PDF version and PowerPoint slides are available under the Instructor s tab **Step-by-Step Medical Coding, 2017 Edition - E-Book** Carol J.
