Fee, 2024-05-30 Contextualizes and analyzes the key energy transitions in U S history and the central importance of energy production and consumption on the American environment and in American culture and politics Focusing on the major energy transitions in U S history from the pre industrial era to the present day this two volume encyclopedia captures the major advancements events technologies and people synonymous with the production and consumption of energy in the United States Expert contributors show how for example the introduction of electricity and petroleum into ordinary American life facilitated periods of rapid social and political change as well as profound and ongoing impacts on the environment These developments have in many ways defined and accelerated the pace of modern life and led to vast improvements in living conditions for millions of people just as they have also brought new fears of resource exhaustion and fossil fuel induced climate change Today as America begins to move beyond the use of fossil fuels toward a greater reliance on renewables including wind and solar energy there is a

pressing need to understand energy in America's past in order to better understand its energy future Research Handbook on International Law and Natural Resources Elisa Morgera, Kati Kulovesi, 2016-11-25 Research Handbook on International Law and Natural Resources provides a systematic and comprehensive analysis of the role of international law in regulating the exploration and exploitation of natural resources. Dad's Best Memories and Recollections Charles J. Humber, 2016-01-19 DAD'S BEST MEMORIES AND RECOLLECTIONS is Chazz Humber's epitaph casting a very long and sentimental shadow across North America and beyond. This 230-page volume is his granite monument, well polished. It lavishly records 125 of his best memories over a life span of nearly eighty years. The vignettes are serenaded with more than 400 illustrations. Those discovering this volume likely will find themselves wanting to record in their own sunset years their personal memories and recollections. And when they do, they are apt to recall what it was like to live in their fluctuating world dominated by a variety of personalities and cascading events. Mr. Humber vividly describes what it was like in 1945 to travel in a 1930 Model A Ford from Toronto to Boston. With lively enthusiasm, he reports what it was like to live in post-World War II Boston, to cook a lobster for a former President of the United States, or to sell a pair of elevator shoes to one of Hollywood's shortest celebrities, or to shine the shoes of a Derby-hatted father of a future President of the United States. It is not a remarkable achievement to reflect, to recall, or to have memories that are treasured. But to tell them with literary aplomb, to recall the events that happened nearly seventy-five years ago with utmost clarity, is definitely an admirable achievement and should be cherished not only by the kin who follow Mr. Humber but by those who might like to imitate what he has monumentally achieved in Dad's Best Memories and Recollections.
