Mutare General Hospital 2015:

Cyclones in Southern Africa Godwell Nhamo, David Chikodzi, 2021-05-24 There is evidence that the world has been witnessing more intense tropical cyclones. Accompanying these tropical cyclones are heightened levels of devastation that witness the loss of human life and wildlife, destruction of natural resources and property, and the disruption of major economic and social activities. To this end, there is a growing demand for publications focusing on tropical cyclones at various levels that include regional, national, and local levels, especially from Africa. One sub-region that has been witnessing the harsh realities of the increasing intensity of tropical cyclones in southern Africa is the region. However, within this region, countries are usually impacted at varying degrees of damage. Among the countries that usually encounter the harshness of these tropical cyclones are the Comoros, Botswana, Madagascar, Mauritius, Malawi, Mozambique, Reunion, the Seychelles, South Africa, and Zimbabwe. From the history books, the following tropical cyclones made landfall and hit southern Africa: Eline 2000, Favio 2007, Dineo 2017, Idai 2019, Kenneth 2019, Eliose 2021, and Chalane 2020. Although all these tropical cyclones had negative impacts, it is undoubtedly Tropical Cyclone Idai that shocked the world with its devastation, mainly in Mozambique, Malawi, and Zimbabwe. In March 2019, key infrastructure was destroyed, livelihoods were lost, and the environment was degraded. Thousands of people died, many more were injured, many remain unaccounted for, and others remained homeless as of the time of finalising this book in February 2021. This book therefore focuses on the devastating impacts of Tropical Cyclone Idai in Zimbabwe. The book interfaces Tropical Cyclone Idai's impacts with the 2030 Agenda for Sustainable Development and some of the 17 Sustainable Development Goals (SDGs). This linkage was deliberate, given that there is still time remaining until 2030 and the world has generally agreed to move into the future along the pathways of sustainable development and sustainability. The book adds to the first comprehensive profiling of the impacts of tropical cyclones on southern African economies, particularly that of Zimbabwe. It also comes up as the first in a three-volume series. The other volumes to look out for are *Cyclones in Southern Africa Vol 2: Foundational and Fundamental Topics* and *Cyclones in Southern Africa Vol 3: Implications for the Sustainable Development Goals*. To this end, this book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies, economics, sustainable development, development studies, environmental sciences, arts, geography, life sciences, politics, planning, and public health.

ZIMBABWE'S MYSTERIOUS MOUNTAIN

DISAPPEARANCES CLIFF McILWAINE, 2015-04-14 A riveting and profound read. This intriguing book retains its momentum from beginning to end. The mysterious disappearances of people in the mist-enshrouded mountains of the Eastern Highlands are used effectively to lay bare much of a dark past. It contrasts events in the new Zimbabwe of the nineties against Rhodesia and a fractured pre-colonial history. It kept me spellbound. Africa holds a unique fascination amidst its exotic landscape, and Cliff McIlwaine captures and brings together an assortment of colourful characters from different cultural backgrounds which enhance the dramatic tensions. A magical combination of the prosaic and the spiritual creates fascinating insights into

the social political and historical ethos of Zimbabwe An enjoyable novel which certainly held my attention Prof C H Muller MA Wales PhD London D ED SA DLitt UOFS Editor *Technologies for Neonatal Care in LMICs* Olugbenga A. Mokuolu, John Kuumuori Ganle ,Tina Marye Slusher,Hippolite Onyejiaka Amadi,2024-09-20 Newborn babies are arguably the most vulnerable class of patients in any society They are entirely incapable of surviving on their own without external help from carers and society A poorly attended newborn will more likely die than one who received well guided and knowledgeable care Therefore the neonatal mortality rate of any society represents a quick measure of the efficiency of its healthcare system available technologies and knowledge base It is common knowledge that low and middle income countries LMICs contribute over 80% of the global annual burden of neonatal deaths Limited access to sustainable technologies for neonatal care is one of the major impediments to lowering neonatal mortality in LMICs Highly sophisticated technologies as applied in high income countries HICs may be unaffordable and unsustainable at LMICs however a well crafted basic technology may be appreciably effective in lifesaving affordable and easily maintainable by the indigenous people The promotion adaptation implementation and scale up of such appropriate technologies by other LMICs could offer them the quickest route to better neonatal survival **Official Telephone Directory** ,2006 Commercial Directory ,2003 Frontiers of Gender Equality Rebecca J. Cook,2023-05-30 In *Frontiers of Gender Equality* editor Rebecca Cook enlarges the chorus of voices to introduce new and different discourses about the wrongs of gender discrimination and to explain the multiple dimensions of gender equality This volume demonstrates that the wrongs of discrimination can best be understood from the perspective of the discriminated and that gender discrimination persists and grows in new and different contexts widening the gap between the principle of gender equality and its realization particularly for subgroups of women and LGBTQ peoples *Frontiers of Gender Equality* provides retrospective views of the struggles to eliminate gender discrimination in national courts and international human rights treaties Focusing on gender equality enables comparisons and contrasts among these regimes to better understand how they reinforce gender equality norms Different regional and international treaties are examined those in the forefront of advancing gender equality those that are promising but little known and those whose focus includes economic social and cultural rights to explore why some struggles were successful and others less so The book illustrates how gender discrimination continues to be normalized and camouflaged and how it intersects with other axes of subordination such as indigeneity religion and poverty to create new forms of intersectional discrimination With the benefit of hindsight the book s contributors reconstruct gender equalities in concrete situations Given the increasingly porous exchanges between domestic and international law various national regional and international decisions and texts are examined to determine how better to breathe life into equality from the perspectives for instance of Indigenous and Muslim women those who were violated sexually and physically and those needing access to necessary health care including abortion The conclusion suggests areas of future research including how to translate the concept of intersectionality into normative and institutional settings which

will assist in promoting the goals of gender equality **Report of the Auditor-General for the Financial Year Ended ...**
