This volume is comprehensively designed to help prospective teachers of English Language (EL) and teachers specializing in English as a foreign language (EFL) mainly in South Asian countries. It analyses the application of ELT theories, concepts and methods to sharpen their understanding of the various techniques used for teaching English effectively in the EFL context. The book discusses the basic concepts of language aimed to develop a sense of the language phenomenon as a unique human attribute. It covers the theories of language from various disciplines such as biology, sociology, psychology and linguistics. The book explains the underlying structures or components that shape the edifice of languages such as phonology, morphology, syntax, grammar, phonetics, semantics and pragmatics. While taking the reader through language learning theories with a focus on English as the second language, it discusses the different teaching methods that can be adopted by teachers in classroom settings. The book will be of interest to teachers, students and researchers of education, teacher education and ELT. It will also be useful for educators, English language teachers, language learners, professionals working in the field of education and language and those who aspire to teach and learn English in foreign context. **The Routledge Handbook of English-Medium Instruction in Higher Education**, Kingsley Bolton, Werner Botha, Benedict Lin, 2024-03-21. We Decide! Michael Menser, 2018-01-31 Participatory democracy calls for the creation and proliferation of practices and institutions that enable individuals and groups to better determine the conditions in which they act and relate to others Michael Menser's timely book *We Decide* is arguably the most comprehensive treatment of participatory democracy He explains the three waves of participatory democracy theory to show that this movement is attentive to the mechanics of contemporary political practices Menser also outlines maximal democracy his own view of participatory democracy that expands people's abilities to shape their own lives reduce inequality and promote solidarity *We Decide* draws on liberal feminist anarchist and environmental justice philosophies as well as in depth case studies of Spanish factory workers Japanese housewives and Brazilian socialists to show that participatory democracy actually works Menser concludes his study by presenting a reconstructed version of the state that is shaped not by corporations but by inclusive communities

driven by municipal workers elected officials and ordinary citizens working together In this era of Bernie Sanders and Donald Trump the participatory democracy proposed in *We Decide* is more significant than ever Refugees in Extended Exile Jennifer Hyndman, Wenona Giles, 2016-10-04 This book argues that the international refugee regime and its temporary humanitarian interventions have failed Most refugees across the globe live in protracted conditions that extend from years to decades without legal status that allows them to work and establish a home It is contended that they become largely invisible to people based in the global North and cease to remain fully human subjects with access to their political lives Shifting the conversation away from the salient discourse of solutions and technical fixes within state centric international relations the authors recover the subjectivity lost for those stuck in extended exile The book first argues that humanitarian assistance to refugees remains vital to people's survival even after the emergency phase is over It then connects asylum politics in the global North with the intransigence of extended exile in the global South By placing the urgent crises of protracted exile within a broader constellation of power relations both historical and geographical the authors present research and empirical findings gleaned from refugees in Iran Kenya and Canada and from humanitarian and government workers Each chapter reveals patterns of power circulating through the colonial present Cold War legacies and the global war on terror Seeking to render legible the more quotidian struggles and livelihoods of people who find themselves defined as refugees this book will be of great interest to international humanitarian agencies as well as migration and refugee researchers including scholars in refugee studies and human displacement human security globalization immigration and human rights *Agricultural, Biosystems, and Biological Engineering Education* Umezuruike Linus Opara, 2024-09-30 Agricultural engineering developed as an engineering discipline underpinned by physics applies scientific principles knowledge and technological innovations in the agricultural and food industries During the last century there was exponential growth in engineering developments which has improved human wellbeing and radically changed how humans interact with each other and our planet Among these Agricultural Mechanization is ranked among the top 10 in a list of 20 Top Engineering Achievements of the last century that have had the greatest impact on the quality of life While many success stories abound the problems of low appeal among students identity crises and limited job opportunities in many climes continue to trouble the discipline's future in many parts of the world Yet agriculture and agricultural engineering remain fundamental to assuring food and nutrition security for a growing global population *Agricultural Biosystems and Biological Engineering Education* provides the first comprehensive global review and synthesis of different agricultural biosystems and biological engineering education approaches including a detailed exposition of current practices from different regions Key Features Describes novel approaches to curriculum design and reform Outlines current and emerging epistemology and pedagogies in ABBE education Provides a framework to grow agricultural engineering in Africa and other developing regions Highlights the role of ABBE education in the context of the SDGs Presented in 3 parts and containing 42 chapters this book

covers the historical evolution of agricultural engineering education and discusses the emergence of biological and biosystems engineering education It will appeal to engineers and other professionals education planners and administrators and policy makers in agriculture and other biological industries Chapters 4 11 19 32 and 41 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Leading the Modern University Lorna R. Marsden, 2016-10-27 Founded in 1959 York University is now the second largest university in Ontario and third largest university in Canada However starting in 1970s the success of the university was far from guaranteed *Leading the Modern University* documents the challenges and solutions that five successive university presidents H Ian Macdonald Harry Arthurs Susan Mann Lorna Marsden and Mamdouh Shoukri encountered from the very early 1970s up to 2014 This book is the rare occurrence where a series of university presidents describe and analyze the challenges they faced regarding financing morale crises and succession With each president contributing a chapter covering her or his own years in office *Leading the Modern University* reveals that large public institutions have internal dynamics and external forces that supersede any individual leader s years in office This is a case study for those interested in organizational change as seen by the leadership of a major public institution during a dynamic period in higher education

Genius in France Ann Jefferson, 2014-12-21 This engaging book spans three centuries to provide the first full account of the long and diverse history of genius in France Exploring a wide range of examples from literature philosophy and history as well as medicine psychology and journalism Ann Jefferson examines the ways in which the idea of genius has been ceaselessly reflected on and redefined through its uses in these different contexts She traces its varying fortunes through the madness and imposture with which genius is often associated and through the observations of those who determine its presence in others Jefferson considers the modern beginnings of genius in eighteenth century aesthetics and the works of philosophes such as Diderot She then investigates the nineteenth century notion of national and collective genius the self appointed role of Romantic

poets as misunderstood geniuses the recurrent obsession with failed genius in the realist novels of writers like Balzac and Zola the contested category of female genius and the medical literature that viewed genius as a form of pathology She shows how twentieth century views of genius narrowed through its association with IQ and child prodigies and she discusses the different ways major theorists including Sartre Barthes Derrida and Kristeva have repudiated and subsequently revived the concept Rich in narrative detail *Genius in France* brings a fresh approach to French intellectual and cultural history and to the burgeoning field of genius studies
