Disciplinary: Functional Linguistic and Sociological Perspectives Frances Christie, Karl Maton, 2011-02-03 Disciplinary knowledge is under threat in the modern world Claims abound that we are entering a landscape in which the division of disciplines is obsolete implying a commitment to outdated values in scholarship Notions of discipline are critiqued as reflecting social power and representing the worldview of dominant social groups By addressing and challenging such claims this edited collection argues that proclamations of the death of disciplines have been greatly

overstated Not only are the notions of disciplinarity still important for understanding how we come to know the world but this volume demonstrates how significant disciplinarity is to understanding different forms of knowledge if we wish to improve the building of knowledge and educational practice Using analytical tools from systemic functional linguistics theory and social realist sociology this volume illustrates how different disciplines can collaborate and cross fertilize successfully without losing their distinctive insights and disciplinary integrity The subsequent theory developed will thereby extend both linguistic and sociological approaches to the topic and make a major contribution to educational theory

Valuing Students with Impairment J. Joy Cumming, 2012-01-05 In this book the author Joy Cumming draws on knowledge of law assessment and measurement to provide an original analysis of the inclusion of students with impairment in educational accountability assessments in the U S England and Australia Equitable education of students with impairment is worldwide policy Educational accountability for improvement of educational outcomes is also a worldwide phenomenon The U S England and Australia are well placed economically and politically to pursue best educational practice for students with impairment and well advanced in both provision and educational accountability systems Examining these three systems enables an analysis of possible optimal practices to guide other countries The book identifies three models of impairment in place in legislation policy and enacted practice for educational accountability with students with impairment Intentions of legislation and policy reflect a social model of impairment while an individual has an impairment social practice creates the barrier that leads to a disability In implementation legislation and policy rely on a medical model of disability categorizing disability in medical or specialist terms In educational accountability practices it is argued in this book a third model of disability is created a psychometric model with impairment constructed through overemphasis on standardization of assessment processes Eight explicit and implicit assumptions that underpin the ways students with impairment are valued in educational accountability are identified and discussed Three recommendations are made to promote equitable inclusive educational accountability

practices for students with impairment to inform future policy and practice in all countries *Curriculum Construction* Laurie Brady,Kerry Kennedy,2013-10-24 Curriculum Construction 5e introduces and analyses all aspects of curriculum development interpretation and implementation The text develops students understanding of both the theoretical and practical components of curriculum construction The theoretical dimension of the text includes coverage of the broad social and political influences on a curriculum coverage of global contexts national curriculum initiatives and a discussion of values in education The practical section of the text provides teachers as well as members of the school community with the knowledge and skills to engage fully in the task of curriculum construction **Constructing Educational Achievement**

Sivanes Phillipson,Kelly Ku,Shane Phillipson,2014-06-03 International interest focuses on why pupils from East Asia tend to outperform pupils from the West and scholars have proposed a number of possible explanations to account for these international trends Using Vygotsky s theory 1978 as a conceptual framework to construct school achievement this book puts forward culturally relevant context for understanding developmental aspects of children s school achievement and their implication to classroom practice and education progress Converging the two important lines of inquiry the child factor and the sociocultural factor this book showcases evidence based scholarly works from across the globe that shed light on causes of academic achievement in different contexts The book brings together eminent scholars from early childhood primary education secondary and vocational education who expertly capture the vitality of development and processes of specific child factors and their interaction with their environment that explain their school achievement Foregrounded in the five planes of cultural historical institutional social personal and mental the research explain how children think learn and form the will to perform amidst the changing social and family environment and challenging school and educational environment

Barkatsas,2014-09-20 This book presents a research focus on diversity and inclusivity in mathematics education The challenge of diversity largely in terms of student profiles or contextual features is endemic in mathematics education and is

often argued to require differentiation as a response Typically different curricula text materials task structures or pedagogies are favoured responses but huge differences in achievement still result If we in mathematics education seek to challenge that status quo more research must be focussed not just on diversity but also on the inclusivity of practices in mathematics education The book is written by a group of experienced collaborating researchers who share this focus It is written for researchers research students teachers and in service professionals who recognise both the challenges but also the opportunities of creating and evaluating new inclusive approaches to curriculum and pedagogy ones that take for granted the positive values of diversity Several chapters report new research in this direction The authors are part of or have visited with the mathematics education staff of the Faculty of Education at Monash University in Melbourne Australia The chapters all focus on the ideas of development in both research and practice recognising that the current need is for new inclusive approaches The studies presented are set in different contexts including Australia China the United States and Singapore

A Picture of Australia's Children 2012 Australian Institute of Health and Welfare, 2012 This report provides updated data on how Australia's children are faring Statistics are presented against key national indicators of child health development and wellbeing including the Children's Headline Indicators Topics include mortality disability breastfeeding dental health physical activity nutrition early childhood education transition to school literacy and numeracy social and emotional development teenage births birth weight alcohol and tobacco use during pregnancy family functioning family economic situation parental health non parental care neighbourhood safety social capital injuries bullying child abuse violence crime homelessness immunisation and screening child care and child protection Though Australian children are doing well in some areas there is still room for improvement especially for children from Aboriginal and Torres Strait Islander backgrounds or from socioeconomically disadvantaged areas
