Question 12: Equilibrium

A closed system brings together two substances through a double gate (H_2), in this case through a concentration-dependent gate (H_2). The graph shows the system's equilibrium state (equilibrium curve) that is not dependent on the initial amount.

- The equilibrium state is independent of the initial amount of H_2 .
- The equilibrium state is independent of the initial amount of H_2 .
- The rate of change of the concentration of H_2 is constant, the rate of change of the concentration of H_2 is constant.
- The equilibrium state is independent of the initial amount of H_2 .

Correct Answer: B. The rate of change of the concentration of H_2 is constant, the rate of change of the concentration of H_2 is constant.

Explanation: The equilibrium state is independent of the initial amount of H_2 and the rate of change of the concentration of H_2 is constant. The rate of change of the concentration of H_2 is constant, the rate of change of the concentration of H_2 is constant.

College Teaching and the Development of Reasoning Robert G. Fuller, Thomas C. Campbell, Dewey I. Dykstra, Scott M. Stevens, 2009-10-01 This book is intended to offer college faculty members the insights of the development of reasoning movement that enlighten physics educators in the late 1970s and led to a variety of college programs directed at improving the reasoning patterns used by college students While the original materials were directed at physics concepts they quickly expanded to include other sciences and the humanities and social sciences On going developments in the field will be included The editors have introduced new topics including discussions of Vygotsky's ideas in relation to those of Piaget of science education research progress since 1978 of constructivist learning theory applied to educational computer games and of applications from anthropology to zoology These materials are especially relevant for consideration by current university faculty in all subjects

International Perspectives on the Design of Technology-supported Learning Environments Stella Vosniadou, Erik De Corte, Robert Glaser, Heinz Mandl, 2012-10-12 In recent years the use of technology for the purposes of improving and enriching traditional instructional practices has received a great deal of attention However few works have explicitly examined cognitive psychological and educational principles on which technology supported learning environments are based This volume attempts to cover the need for a thorough theoretical analysis and discussion of the principles of system design that underlie the construction of technology enhanced learning environments It presents examples of technology supported learning environments that cover a broad range of content domains from the physical sciences and mathematics to the teaching of language and literacy The emphasis in this book is not on the design of educational software but on the design of learning environments A great deal of research on learning and instruction has recently moved out of the laboratory into the design of applications in instructional settings By designing technology supported learning environments instructional scientists attempt to better understand the theories and principles that are explicit in their theories of learning The contributors to this volume examine how factors such as social interaction the creation of meaningful activities the use of multiple perspectives and the construction of concrete representations influence the acquisition of new information and transfer
