

with their parents.

Activity A:

Patterns of inheritance

Get the Gizmo ready:

- Click **Clear**.
- Drag a black mouse and a white mouse into the parent boxes, but don't click **Breed** yet.

Question: What patterns are shown by offspring traits?

1. Predict: What do you think the offspring of a black mouse and a white mouse will look like?

a blend in its initial generation The majority of them resemble black mice, but if we look at later generations, we might anticipate seeing some white mice.

2. Observe: Click **Breed** several times. What do you see?

Only black mice that are moving are visible to me.

3. Observe: Drag two offspring into the **Holding Cages**. These mice are called **hybrids** because their parents had different traits. Click **Clear**, and then breed the two hybrids.

What do you see now?

I observed four black mice and one white mouse from a second generation of black and white mice.

4. Experiment: Turn on **Show statistics**. Click **Breed** until there are 100 offspring.

How many offspring were black?

69

How many were white?

31

5. Explore: Try other combinations of mouse parents. Write the results of each experiment in your notes. When you have finished, answer the following questions. (Note: You can refer to the parents as "pure black," "pure white," or "hybrid.")

- A. Which parent combination(s) yield only white offspring?
- B. Which parent combination(s) yield only black offspring?
- C. Which parent combination(s) yield a mixture of black and white offspring?

pure white

pure black

hybrid

6. Challenge: Based on experiments similar to these, Gregor Mendel devised a theory of inheritance. Use your own observations to come up with your own explanation of how a trait such as fur color is passed down from parents to offspring. If possible, discuss your theory with your classmates and teacher.
