Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning, Killham et al 2014, Wong et al 2018, PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments. Molnar et al 2021, Seaman et al 2018. This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy. Brigido, Borrachero, Bermejo, Gunning, Duran, 2004. Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation. **Earth & Space Grade 7** Bellaire, Tracy, The activities in this book have two intentions: to teach concepts related to earth and space science and to provide students the opportunity to apply necessary skills needed for mastery of science and technology curriculum objectives. Throughout the experiments, the scientific method is used. In each section, you will find teacher notes designed to provide guidance with the learning intention, the success criteria, materials needed, a lesson outline, as well as provide insight on what results to expect when the experiments are conducted. Suggestions for differentiation are also included so that all students can be successful in the learning environment. Topics covered include Heat in the Environment, Energy, Sustainability, and Stewardship Systems and Interactions. 96 Pages. **Exploring Earth and Space** Michael DiSpezio, 1995. A textbook exploring such aspects of matter and energy as heat, electricity, and nuclear chemistry with suggested activities and review questions at the end of each chapter. **Addison-Wesley Science Insights**, 1996. **ENC Focus**, 2000. **Understanding Earth** John Grotzinger, Thomas H. Jordan, 2010. Chapter by chapter help for studying and exam review with lots of support for working with the book's media resources. **Teaching with Inquiry** Catherine Snyder, Mary Eads, Sean O'Connell, Richard Lasselle, Sherri Duan, Daniel Mattoon, Patti Rand, 2023-05-22. Inquiry Learning is an innovative hands-on and collaborative approach to student learning. The Inquiry Learning Model shifts the heavy cognitive lifting from the teacher to the student. Documents and artifacts are used to provoke deep analysis and hone critical thinking skills as students work in teams to interpret and connect clues to solve a mystery. A detailed step-by-step methodology is provided, as well as six multidisciplinary lessons. Lessons are suitable for collaborative teaching or stand alone in discipline-specific classes. For example, Exploitation

and Immortality The Story of Henrietta Lacks is a lesson that can be used in the science social studies English or math classroom or a combination of any of these disciplines In addition to the methodology and lessons Teaching with Inquiry includes differentiation strategies to adapt lessons to all learners suggestions for lesson use in multiple disciplines and a variety of graphic organizers to help students organize process and summarize the information throughout the lesson
