Explore Compared To Act:

Insomnia and beyond - Exploring the therapeutic potential of orexin receptor antagonists Michel Alexander Steiner, Christopher J Winrow, 2014-11-11 Orexin hypocretin neuropeptides produced by a few thousand neurons in the lateral hypothalamus are of critical importance for the control of vigilance and arousal of vertebrates from fish to amphibians birds and mammals Two orexin peptides called orexin A and orexin B exist in mammals They bind with different affinities to two distinct widely distributed excitatory G protein coupled receptors orexin receptor type 1 and type 2 OX1 and OX2 The discovery of an OX1 mutation causing canine narcolepsy the narcolepsy like phenotype of orexin peptide knockout mice and the orexin neuron loss associated with human narcoleptic patients laid the foundation for the discovery of small molecule OX1 antagonists as novel treatments for sleep disorders Proof of concept studies from Glaxo Smith Kline Actelion Pharmaceuticals Ltd and Merck have now consistently demonstrated the efficacy of dual OX1/2 antagonists DORAs in promoting sleep in rodents dogs non human primates and humans Some of these antagonists have completed late stage clinical testing in primary insomnia Orexin drug discovery programs have also been initiated by other large pharmaceutical companies including Hoffmann La Roche Novartis Eli Lilly and Johnson Johnson Orexins are increasingly recognized for orchestrating the activity of the organism's arousal system with appetite reward and stress processing pathways Therefore in addition to models of insomnia pharmacological effects of DORAs have begun to be investigated in rodent models of addiction depression and anxiety The first clinical trials in diabetic neuropathy migraine and depression have been initiated with Merck's MK-0609 www.clinicaltrials.gov Whereas the pharmacology of DORAs is established for their effects on wakefulness pharmacological effects of selective OX1 or OX2 antagonists SORAs have remained less clear From an evolutionary point of view the OX2 was expressed first in most vertebrate lineages whereas the OX1 is believed to result from a gene duplication event when mammals emerged Yet both receptors do not have redundant function Their brain expression pattern their intracellular signaling as well as their affinity for orexin A and orexin B differs During the past decade most preclinical research on selective OX1 antagonism was performed with SB-334867 Only in recent years other selective OX1 and OX2 antagonists with optimized selectivity profiles and pharmacokinetic properties have been discovered and phenotypes of OX1 and OX2 knockout mice were described The present Research Topic referred to in the Editorial as special topics issue comprises submissions of original research manuscripts as well as reviews directed towards the neuropharmacology of OX1/2 antagonists The submissions are preclinical papers dealing with dual and/or selective OX1/2 antagonists that shed light on the differential contribution of endogenous orexin signaling through both OXRs for cellular physiological and behavioral processes Some manuscripts also report on convergence or divergence of DORA vs SORA effects with phenotypes expressed by OX1 or OX2 knockout animals Ultimately these findings may help further define the potential of DORAs and SORAs in particular therapeutic areas in insomnia and beyond insomnia

Exploring National Environmental Policy Act

Processes Across Federal Land Management Agencies Marc J. Stern, 2010-10 Broad discretion is granted at all levels throughout federal land management agencies regarding compliance with the National Environmental Policy Act NEPA The authors explored the diversity of procedures employed in NEPA processes across four agencies the Forest Service the Nat Park Service the Bureau of Land Management and the U S Army Corps of Eng There is a lack of consistency not only between but also within agencies with regard to how NEPA is implemented This report focuses on how successful NEPA processes are defined within each agency and what strategies are the most or least beneficial to positive NEPA outcomes Also identifies unresolved questions about NEPA processes and presents a research strategy for addressing them Exploring Masculinities Martha Albertson Fineman, Michael Thomson, 2016-04-15 While masculinities theory has had much to say on relationships of subordination few feminist legal scholars have examined the implications of masculinities theory for feminist legal theory This volume investigates the ways in which emerging masculinities theory in law could inform feminist legal theory in particular and law in general As many of the chapters in this collection illustrate law is constantly in a dynamic interaction with masculinities it has both influenced existing masculinities and has been influenced by those masculinities The contributions focus feminist and critical theoretical attention on masculinities and consider the implications of masculinities theory for law and legal theory The book sets out the theoretical trajectory of masculinities studies as a field and its application in law and uses insights from a masculinities approach to study socio political construction of gender identities in specific settings It also explores how understanding historical construction of gender identities can inform more effective public policy and activism Written by leading experts in the area the book poses important questions about the development of the relationship between feminisms and masculinities theory and will be essential reading for those working in law and gender and related areas *Exploring Masculinities* Professor Martha Albertson Fineman, 2013-11-21 Written by leading experts in the area this volume investigates the ways in which emerging masculinities theory in law could inform feminist legal theory in particular and law in general As many of the chapters in this collection illustrate law is constantly in a dynamic interaction with masculinities it has both influenced existing masculinities and has been influenced by those masculinities The contributions focus feminist and critical theoretical attention on masculinities and consider the implications of masculinities theory for law and legal theory Exploring the National Criminal Justice Commission Act of 2009 United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Crime and Drugs, 2010 Exploring Health Communication Kevin Harvey, Nelya Koteyko, 2012-11-27 Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics primarily designed for those beginning postgraduate studies or taking an introductory MA course as well as advanced undergraduates Titles in the series are also ideal for language professionals returning to academic study The books take an innovative practice to theory approach with a back to front structure This leads the reader from real world problems and issues through a discussion of intervention and

how to engage with these concerns before finally relating these practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms and an annotated further reading section. *Exploring Health Communication* brings together many of the various linguistic strands in health communication while maintaining an interdisciplinary focus on method and theory. It critically explores and discusses a number of underlying themes that constitute the broad field of health communication including spoken, written and electronic health communication. The rise of the internet has led to an explosion of interactive online health resources which have profoundly affected the way in which healthcare is delivered and with this have brought about changes in the relationship between provider and patient. This textbook uses examples of real life health language data throughout in order to fully explore the topics covered. *Exploring Health Communication* is essential reading for postgraduate and upper undergraduate students of applied linguistics and health communication. *Legislative Hearings on the Construction Safety, Health, and Education Improvement Act of 1990*

United States. Congress. House. Committee on Education and Labor. Subcommittee on Health and Safety, 1990. *Exploring Politeness in Business Emails* Vera Freytag, 2019-10-11. *Exploring Politeness in Business Emails* explores the contextual complexities of workplace emails by comparing British English and Peninsular Spanish directive speech events and systematically assessing the impact of contextual factors. Through a combination of qualitative and quantitative methods of data collection and analysis and the inclusion of metapragmatic insights in the interpretation of the results, the book offers an innovative approach to the study of politeness. The book partially contradicts previous assumptions about English and Spanish directives and provides new insights into the role of politeness in the workplace. By offering a meticulous account of the linguistic choices made by the English and Spanish first language users and the contextual factors influencing these choices, the book suggests far reaching implications for future research in cross cultural pragmatics and business discourse as well as practical implications relevant for academics, postgraduate students and practitioners interested in these fields.

Exploring the Potential of Natural Products through Advanced Techniques Mauricio A. Rostagno, Ana Carolina De Aguiar, Gerardo Fernández Barbero, Marta Ferreiro González, 2021-01-20. **Analyze, Act, Advance** Agustín Argelich Casals, 2015-02-25. This is a book of reflections that aims to help you think. It is an innovative compendium of technology and autodidactic humanism suggesting building a culture of constant improvement and renewal as a long term strategy not only in times of crisis but also in times of growth. It is a book that is based on everyday life experiences. It is not an academic text but a book to encourage you to act smart and wise. I do hope that you find in it useful inspirational and motivational ideas and that it will positively impact you. We are not facing complex times but an exciting time in which our great opportunity has not come yet. One way or another all ages have been challenging. You just need some historical perspective to realize that we now have the best technology, the best communication between humans and great knowledge of each other.
