Lab-At-Home Experiments in Chemistry and Chemical Engineering Jude A. Okolie,Ugochukwu Patrick Okoye,2025-10-28 With the rise of remote and hybrid learning there is an increasing need for flexibility around laboratory based coursework This book offers readers a guide to conducting a wide variety of chemistry and chemical engineering labs and experimental procedures that can be completed easily and safely outside of a traditional lab setting including at home It helps students and interested readers achieve hands on learning of chemistry and chemical engineering based concepts without the need for sophisticated lab equipment Features a comprehensive range of labs on such topics as separation processes CO₂ capture 3D printing reaction kinetics and fuel cells Includes detailed information on how to perform experiments at home via virtual experimental procedures and accompanying videos Uses household and readily accessible materials and provides safe material handling and disposal methods Offers solution spreadsheets where experimental results can be computed and validated Gives background information and relevant theory about each experiment and includes exercises at the end of each chapter Provides Python code and instructions on how to perform experiments including a bowling example This practical and useful guide is aimed at chemistry and chemical engineering students as well as general readers interested in running experiments in these disciplines Video supplements to support comprehension of each lab and a solutions spreadsheet for Chapter 1 are available for download

Exploration and Production of Oceanic Natural Gas Hydrate Michael D. Max,Arthur H. Johnson,2018-10-24 This second edition provides extensive information on the attributes of the Natural Gas Hydrate NGH system highlighting opportunities for the innovative use and modification of existing technologies as well as new approaches and technologies that have the potential to dramatically lower the cost of NGH exploration and production Above all the book compares the physical environmental and commercial aspects of the NGH system with those of other gas resources It subsequently argues and demonstrates that natural gas can provide the least

expensive energy during the transition to and possibly within a renewable energy future and that NGH poses the lowest environmental risk of all gas resources. Intended as a non-mathematical descriptive text that should be understandable to non-specialists as well as to engineers concerned with the physical characteristics of NGH reservoirs and their production, the book is written for readers at the university graduate level. It offers a valuable reference guide for environmentalists and the energy community and includes discussions that will be of great interest to energy industry professionals, legislators, administrators, regulators, and all those concerned with energy options and their respective advantages and disadvantages.

Nature of Science in Science Instruction William McComas, 2020-08-24. This book offers a comprehensive introduction to Nature of Science (NOS), one of the most important aspects of science teaching and learning, and includes tested strategies for teaching aspects of the NOS in a variety of instructional settings. In line with the recommendations in the field to include NOS in all plans for science instruction, the book provides an accessible resource of background information on NOS rationales for teaching these targeted NOS aspects and most importantly how to teach about the nature of science in specific instructional contexts. The first section examines the why and what of NOS, its nature, and what research says about how to teach NOS in science settings. The second section focuses on extending knowledge about NOS to questions of scientific method, theory-laden observation, the role of experiments and observations, and distinctions between science, engineering, and technology. The dominant theme of the remainder of the book is a focus on teaching aspects of NOS applicable to a wide variety of instructional environments.

Applied Informatics and Communication, Part I Dehuai Zheng, 2011-08-02. The five-volume set CCIS 224-228 constitutes the refereed proceedings of the International Conference on Applied Informatics and Communication (ICAIC 2011) held in Xi'an, China, in August 2011. The 446 revised papers presented were carefully reviewed and selected from numerous submissions. The papers cover a broad range of topics in computer science and interdisciplinary applications, including control hardware and software systems, neural computing, wireless networks, information systems, and image processing.

Proceedings of the International Field Exploration and Development Conference 2022 Jia'en Lin, 2023-08-05. This book focuses on reservoir surveillance and management, reservoir evaluation, and dynamic description, reservoir production stimulation, and EOR, ultra-tight reservoir, unconventional oil and gas resources, technology, oil and gas well production testing, and geomechanics. This book is a compilation of selected papers from the 12th International Field Exploration and Development Conference (IFEDC 2022). The conference not only provides a platform to exchange experience but also promotes the development of scientific research in oil and gas exploration and production. The main audience for the work includes reservoir engineers, geological engineers, enterprise managers, senior engineers, as well as professional students.

Development and Protection of Mineral Resources Mohamed Abdelkader Ismail, Leiming Wang, 2024-12-23. This book comprises papers that showcase recent advancements and applications of innovative technologies in mining, offering theoretical insights and practical references for industry professionals. The 8th International

Conference on Mineral Resources Geotechnology and Geological Exploration MRGGE 2024 was successfully held on June 14-16, 2024, in Shijiazhuang, China. This conference aims to address the dual challenge of providing essential mineral resources while ensuring environmental protection and sustainability in the mining industry. The proceedings encompass a wide range of topics including ecological restoration of mines, geotechnical engineering, cleaning materials, geological exploration, and energy storage. The intended readership includes engineers, consultants, managers, academics, scientists, and government officials actively engaged in the mineral industry, serving as a valuable resource for promoting sustainable practices and advancing the field.

Working with Chemistry Donald J. Wink, Sharon Fetzer-Gislason, Julie Ellefson Kuehn, 2004-02-20. With this modular laboratory program, students build skills using important chemical concepts and techniques to the point where they are able to design a solution to a scenario drawn from a professional environment. The scenarios are drawn from the lives of people who work with chemistry every day, ranging from field ecologists to chemical engineers and include many health professionals as well.

Wilfrid Sellars James O'Shea, 2015-02-13. The work of the American philosopher Wilfrid Sellars continues to have a significant impact on the contemporary philosophical scene. His writings have influenced major thinkers such as Rorty, McDowell, Brandom, and Dennett, and many of Sellars' basic conceptions, such as the logical space of reasons, the myth of the given, and the manifest and scientific images, have become standard philosophical terms. Often, however, recent uses of these terms do not reflect the richness or the true sense of Sellars' original ideas. This book gets to the heart of Sellars' philosophy and provides students with a comprehensive critical introduction to his life's work. The book is structured around what Sellars himself regarded as the philosopher's overarching task: to achieve a coherent vision of reality that will finally overcome the continuing clashes between the world as common sense takes it to be and the world as science reveals it to be. It provides a clear analysis of Sellars' groundbreaking philosophy of mind, his novel theory of consciousness, his defense of scientific realism, and his thoroughgoing naturalism with a normative turn. Providing a lively examination of Sellars' work through the central problem of what it means to be a human being in a scientific world, this book will be a valuable resource for all students of philosophy.
