

Introduction to Lash Extensions

What are lash extensions? A semi-permanent cosmetic treatment that involves attaching synthetic or natural hair fibers to the natural eyelashes using a special adhesive.

Benefits of lash extensions include:

- Enhanced eye appearance
- Long-lasting results (up to 6-8 weeks)
- No need for mascara or eyeliner
- Customizable length and volume

Types of lash extensions:

- Classic: One extension per natural lash
- Volume: Multiple extensions per natural lash
- Hybrid: Combination of classic and volume

Client Consultation

Before the procedure, a thorough consultation is essential to ensure client safety and satisfaction.

Key questions to ask:

- Are you pregnant or breastfeeding?
- Do you have any eye conditions or allergies?
- Are you taking any medications?
- Do you have any previous lash treatments?

Contraindications for lash extensions include:

- Eye infections or inflammation
- Recent eye surgery
- Severe allergies to adhesives
- Unstable medical conditions

Lash Anatomy

Understanding the structure of the eyelash is crucial for proper application.

The lash cycle consists of three phases:

- Anagen (Growth):** The active growth phase where the lash is attached to the follicle.
- Catagen (Transition):** The transitional phase where the lash detaches from the follicle.
- Telogen (Rest):** The resting phase where the lash is shed and a new one begins to grow.

Parts of the lash:

- Follicle:** The base of the lash where it grows.
- Shaft:** The visible part of the lash.
- Tip:** The end of the lash.

Tools and Materials

Essential tools for lash extension application:

- Lash tweezers (precision and dominant hand)
- Adhesive (cyanoacrylate-based)
- Extension lashes (various lengths and volumes)
- Primer (optional, to prep natural lashes)
- Sealant (optional, to seal the adhesive)

Preparation of the workspace:

- Sanitize all tools and surfaces
- Use a clean, well-lit environment
- Wash hands thoroughly

Application Techniques

Step-by-step guide to applying lash extensions:

- Prep:** Cleanse the eye area and remove any makeup.
- Isolation:** Use tweezers to isolate a single natural lash.
- Adhesive Application:** Dip the extension into the adhesive.
- Attachment:** Attach the extension to the natural lash, avoiding the eyelid.
- Repeat:** Continue the process for all desired lashes.

Common mistakes to avoid:

- Applying extensions too close to the eye
- Using too much adhesive
- Not isolating lashes properly
- Applying extensions to multiple natural lashes

Aftercare and Maintenance

Proper aftercare is vital for the longevity of the lash extensions.

Client instructions:

- Avoid water and steam for 24-48 hours.
- Do not rub or pull at the lashes.
- Use oil-free eye makeup removers.
- Brush the lashes gently with a clean spoolie.

Refill schedule:

- Classic: Every 2-3 weeks
- Volume: Every 2-3 weeks

Business Fundamentals

Setting up a successful lash business involves several key factors:

Pricing: Determine your costs and set competitive prices for different services.

Marketing: Use social media, referrals, and local advertising to attract clients.

Legal: Obtain necessary licenses and insurance.

Customer Service: Provide a professional and comfortable experience to build a loyal clientele.
