

Thank you for purchasing a Firex smoke alarm. It is an important component of your home security system. Please read this document thoroughly. The more familiar you are with the information it contains, the easier you will find it to install, operate, and maintain your smoke alarm properly, which ultimately means greater security and peace of mind for you and your family.

#### Smoke Alarm Advantages

Fire protection type alarms are generally more effective at detecting fire, warning you, and alerting your family more quickly and easily. Alarms of most types include flameless liquid or glass burning in a sealed container. The photoelectric type alarms are generally more effective at detecting fires, including fires that cannot be seen before burning into flames. Alarms of these two types include separate burning in a container or burning. However, both types of alarms are designed to provide adequate detection of both types of fires. If you have the flameless optical system, you should install smoke alarm that contains a low level of smoke (not photoelectric) and detection burning technology.
